High School Guidance Program Planned For Potential MIT Men

On Thursday, October 4, a new guidance program will be inaugurated by the Institute, in order to assist high school counselors with MIT's requirements and selection policies. The annual conference will attract approximately 80 advisors from Fulbright Program Presents Opportunity For Overseas Study

Kenneth Holland, President of the Institute of International Education, has announced the availability of Fulbright awards to winners in the competition for those educational exchange grants. The awards, under the Fulbright Act and the caucus of the American Cultural Relations, are part of the international exchange activities of the Department of State. MIT seniors and graduate students are eligible for these financial awards. The awards are given for study in a foreign country, and cover transportation, exchange of a language course, tuition, board, and maintenance for one academic year. Supplementary financial aid is available for married MIT students studying chemistry, physics, mathematics, and biology.

For information see Fulbright Program Advisor David Sudler, Room 3-168, by Friday, October 18.

Glass Exhibit Oct. 9 Use To Be Explained

"Glass as a versatile engineering material" is the theme of a traveling exhibition that will be at Massachusetts Institute of Technology on October 9. The exhibit will be displayed in a special van that is showing industrial applications of Pyrex brand glass units and components to industries and universities throughout the country. In the van, open from 2 to 4 p.m. will be displayed equipment pieces such as Pyrex brand clear and armored glass pipes, working model of a glass shell and tube heat exchanger, glasses used in the shielding glazing, and laboratory and pharmaceutical uses.

A coming engineer accompanies the exhibit to discuss and explain the use of glass as an engineering material.
