APL wants graduates eager to accept the challenge of responsibility

The Applied Physics Laboratory (APL) of The Johns Hopkins University is a unique organization. Its professional staff, including both junior and senior members, is allowed a measure of responsibility and initiative much greater than in many other research and development organizations. A stimulating environment where teamwork and individual initiative are fused results in a high degree of creativeness and professional gratification.

For years APL has pioneered: the first proximity fuze, the first supersonic ramjet engine, the missiles TERRIER, TALOS and TARTAR. With a staff of 1275 associate and subcontractors, among them leading universities and industrial organizations. APL maintains a splendid professional staff, including those of industrial organizations, recently completed, encompassing 350,000 sq. ft. Their locations in suburban Washington and Baltimore, Md. allow staff members to enjoy suburban, rural or urban living and the manifold cultural and recreational facilities of both cities.

APL maintains a splendid program of staff benefits, including financial assistance for advanced study. Salaries compare favorably with those of industrial organizations. For detailed information on staff opportunities for men with higher-than-average grades contact your Placement Officer or write: Professional Staff Appointments, 8621 Georgia Avenue, Silver Spring, Md.

Representative On CAMPUS
Tues., Nov. 13, Wed., Nov. 14
