NORTH AMERICAN AVIATION, INC.

PROBLEM: To evaluate the all-round career advantages offered by the widely diversified activities at Divisions of North American Aviation, Inc.

FIRST STEP: GET THE FACTS in man-to-man interviews, on campus. December 3, 4, 5

As a graduate in Engineering, Physics, Applied Math, or allied subjects you need complete, factual information to help you make a sound decision in choosing your career. Get the facts in a man-to-man interview with our representative. Let him tell you about our unique placement program and training devised to help your potential develop rapidly in a company where continued expansion has doubled the number of employees in 5 years. Your possibilities are wide and varied, as you will see from these brief notes on the 4 Divisions:

AUTONETICS creates automatic controls and electro-mechanical systems of a highly interesting nature. Work includes research, design, development, manufacture and testing; you will become a part of the latest advances in inertial navigation and guidance, fire and flight controls, analog and digital computers.

ROCKETDYNE is building power for outer space—liquid propellant rocket engines. The Field Test Laboratory in the Santa Susana Mountains is the most complete rocket engine workshop in the free world. Here a man learns more aspects of his specialty in one week than in a year of "conventional" practice.

ATOMICS INTERNATIONAL is pioneering in the two most fascinating and challenging fields: nuclear engineering and rocket engineering. "Conventional" practice. Chances are the opportunities for you, as a creative engineer, are correspondingly great.
