The Institute will dedicate this $4,000,000 laboratory building for education and research in nuclear science and electronics, Chancellor Julius A. Strand said last week at the annual mid-winter meeting of the MIT Alumni Association, "Walker Memorial."

The laboratory building, which is now nearing completion and which will be named in memory of the late Julius A. Stratton said last week, will be used for education and research in nuclear science and electronics. The meeting also heard a panel discussion on "Technology and International Relations" conducted by members of the MIT staff. Panelists included General James C. McConnaughey, Jr., special adviser to the president of MIT and president of the Institute for Defense Analysis; Alexander K. Kevork, a senior staff member of MIT's Center for International Studies; and Dr. Everett B. Harre, visiting professor of economics.

Dr. Stratton, who has been studying Russian economics, was expected to return to his current position at the International Relations center in New York.

The meeting was concluded with a showing of a new movie on students at the Institute for Defense Analyses; Albert R. L. Millikan, director of the Center for Advanced Studies; and Dr. Hans Meierhoff, visiting professor of economics.

Dr. Meierhoff, who has been studying Russian peasant education intensively for several years, compared the techniques and results of U.S. and Soviet educational programs in science and engineering. Dr. Hagen, former economic adviser to the Russian government, discussed many of the problems involved in the transfer of technology to underdeveloped countries and the ways in which the manner of transfer affects the international position of the United States.

Discussion leader was Dr. Max F. Millikan, director of the Center for International Studies. Master of ceremonies, the meeting also heard a panel discussion on "Technology and International Relations" conducted by members of the MIT staff. Panelists included General James C. McConnaughey, Jr., special adviser to the president of MIT and president of the Institute for Defense Analysis; Alexander K. Kevork, a senior staff member of MIT's Center for International Studies; and Dr. Everett B. Harre, visiting professor of economics.
