Calendar of Events

TUESDAY, FEBRUARY 12, 19

The Technological Academy, MIT, will have a new look on February 12, when the calendar of events is distributed to the staff through the Institute's branch of The Special Events Office. The calendar will be available until February 27.

The Technological Academy is a series of lectures, discussions, and demonstrations that are open to the public. The lectures cover a wide range of topics, from the history of science and technology to current research and development. The calendar includes events such as the lecture "The Future of the Internet" by Dr. Vinton Cerf, "The Science of Music" by Dr. Robert Gold, and "The History of Computing" by Dr. Stanley Gurevitch.

In addition to the lectures, the Technological Academy also includes a series of workshops, seminars, and hands-on demonstrations. These events are designed to be interactive and engaging, and are open to anyone interested in learning more about technology and its impact on society.

The Technological Academy is free and open to the public, and all events are posted on the MIT website. For more information, please visit the MIT website or contact the Special Events Office at 781-221-3800.
