Avoid key favors
New Election Setup, May Elect Up To 40

The members of next year’s Beaver team were picked in a new way, it was announced recently. The Junior Honorary Society was adopted to shoulder the old-fashioned election of a newspaper in favor of a new which provides for the election of candidates only on his merits and not his position or other factors. Also, the Beaver now has an "electee" system, with a maximum of ten votes per member.

However, only sixteen of the twenty-five key members were present; of which voted for the plan, but a few members voted against the new system which may not be as efficient. The remaining votes (16) cast by absentee ballots.

The key, the Sophomore Quadrangle Club, finally elected the next phase of the system by the following in the meeting: Each member was given ten votes, and the list of nominations was made. The top ten were set, however, as a maximum, since forty was exceeded in the meeting, and the last ten voted on only forty. During the meeting, however, fifty-seven students had received a majority of the votes, and the membership went over forty. The twenty friedon candidates would choose, but not more than twenty, the final ten proctors of the club.

The new election system brings about a new system of which a rule is taken on him. A two-thirds vote is needed for membership. If he does not make it at the next meeting, he is given a second chance to run for the position.

The Tech, the Sophomore Quadrangle Club, is now holding elections on a new system. Each member is given ten votes, and the list of nominations is made. The top ten were set, however, as a maximum, since forty was exceeded in the meeting, and the last ten voted on only forty. During the meeting, however, fifty-seven students had received a majority of the votes, and the membership went over forty. The twenty friedon candidates would choose, but not more than twenty, the final ten proctors of the club.
