If a graduate is willing, it may apply for induction prior to graduation. If he does apply for the six-month program, he may wait until he has received an Induction Notice before doing so. His Board will take into consideration the date on the BCS College Qualification Test and may request a Form 199 giving his place in class as a junior, or they may require a complete transcript of his grades. The case then goes to the Selective Advisory Committee attached to the State Headquarters for Selective Service in the State in which he works. Upon completion of six months active duty, scientists and engineers who fulfill their obligation by remaining to be employed on a critical job or there are no other specialized qualifications. Those interested in this program are divided into the following three categories:

1. Those with the least academic qualifications who are not a necessary prerequisite and who are formally qualified for Line; who have an engineering or scientific background; or who are technical graduates.

2. Those with the next least academic qualifications who are formally qualified for Line; who are physically and mentally qualified for Line; who are technical graduates.

3. Those with the highest academic qualifications who are formally qualified for Line; who are technically qualified; and who are technical graduates.

Any and all back grounds may be helpful in certain situations. The Naval Officer candidate program provide an opportunity for college graduates to receive a commission in the United States Naval Reserve after four months of indoctrination at Officers Candidate School. Those interested in this program are divided into the following three categories:

1. Those with the least academic qualifications who are not a necessary prerequisite and who are formally qualified for Line; who have an engineering or scientific background; or who are technical graduates.

2. Those with the next least academic qualifications who are formally qualified for Line; who are physically and mentally qualified for Line; who are technical graduates.

3. Those with the highest academic qualifications who are formally qualified for Line; who are technically qualified; and who are technical graduates.

For those who are drafted into the Army, there is a scientific and technical program. All commissions are on a critical job or there are no other specialized qualifications. Those interested in this program are divided into the following three categories:

1. Those with the least academic qualifications who are not a necessary prerequisite and who are formally qualified for Line; who have an engineering or scientific background; or who are technical graduates.

2. Those with the next least academic qualifications who are formally qualified for Line; who are physically and mentally qualified for Line; who are technical graduates.

3. Those with the highest academic qualifications who are formally qualified for Line; who are technically qualified; and who are technical graduates.

Engineering, Scientists, Physicists, Mathematicians... Like to Help with the Next One?

The North American airplanes of the future will be designed by the creative potential of today's young men. Possibly you—or members of your graduating class—will help to engineer them. One thing is certain. They will have to be the best to meet the space reserved the famous North American planes pictured in this ad. Designing the best airplanes to meet the demands of the future is the challenging work North American offers to graduate engineers and to specialists in other sciences. If you want to work on advanced projects right from the start...enjoy recognition and personal rewards...live and work in Southern California...then join North American's outstanding engineering team. See your Placement Officer today to arrange for an appointment with North American Engineering representatives...they will be on campus on:

March 12, 13

If you are not available at this time, please write:
