Faculty Changes Has Promotions, Appointment of Famous Foreigners

Two famous Europeans have been appointed to teach at MIT this month, it was announced recently.

Dr. Constantin A. Doxiadis, who has been appointed Albert Farwell Balch Professor of City and Regional Planning, specializes in the field of housing in underdeveloped areas. He was an adviser to the World Bank in 1955 and last year his capacity has developed plans for housing in Syria, Jordan, Iraq, Lebanon, and Pakistan, and has been invited twice to assist in housing developments in India. He was a member of the Greek delegation to the San Francisco Conference and was Minister of the Greek Recovery Program from 1942 to 1951.

Dr. Renato A. Barbieri is one of the outstanding young European scientists. Only 22 years old, he is a world expert in theoretical and experimental phases of research on semiconductors. He has been appointed Visiting Webster Professor of Electrical Engineering in the field of housing in underdeveloped areas. He was an adviser to the World Bank in 1955 and last year his capacity has developed plans for housing in Syria, Jordan, Iraq, Lebanon, and Pakistan, and has been invited twice to assist in housing developments in India. He was a member of the Greek delegation to the San Francisco Conference and was Minister of the Greek Recovery Program from 1942 to 1951.

Dr. Pierre Algrain is one of the outstanding young European scientists. Only 32 years old, he is a world expert in theoretical and experimental phases of research on semiconductors. He has been appointed Visiting Webster Professor of Electrical Engineering in the field of housing in underdeveloped areas. He was an adviser to the World Bank in 1955 and last year his capacity has developed plans for housing in Syria, Jordan, Iraq, Lebanon, and Pakistan, and has been invited twice to assist in housing developments in India. He was a member of the Greek delegation to the San Francisco Conference and was Minister of the Greek Recovery Program from 1942 to 1951.

MIT Best Engineering School In U.S., Cal Tech Leads In Science, Survey Shows

MIT was declared the best engineering school in the country in a survey conducted by the Chicago Tribune, the results of which were announced in the Tribune’s April 21st.

The object of the survey was to obtain “an authoritative rating of America’s institutions, in the order of their excellence.” The results were obtained by interviewing more than fifty university and college presidents, faculty deans, scholars, scientists, and administrative officials. According to the Tribune, “it would be difficult to find a more distinguished representative group of scholars in the various branches of learning. A list of the ‘consultants’ did not include anyone from MIT, though one graduate of MIT was on the list.”

The survey results were then analyzed by a group of consultants who ranked the institutions according to their eminence. The results of which were announced in the Tribune’s April 21st.

Fulbright To Zombek Senior Scry-Trears

Another Fulbright Scholarship for an MIT man has been announced. Martin V. Zombek ’57, who is in Course eight, will continue his studies in Physics at the Free University of Berlin.

Mr. Zombek, who is a member of the Delta Upsilon fraternity, is also a member of the Delta Upsilon fraternity, and is also Secretary-Treasurer of the Class of ’57.

Mr. Zombek lives in Denver, New York.
