Physics Project
In Frosh Course Is Held Possible

Professor Karl Uno has announced, in charge of the Freshmen physics program, that he is planning a textbook in cooperation with the Freshman Physics Group. The book will probably be available in the fall of 1957, after the incoming class of 1961.

A tentative change in the first year physics curriculum is also being considered, in connection with the new text. With the aim of making 6.01 and 6.02 more stimulating, Professor Engdahl would like to introduce a "project", i.e., a long range effort that could replace something else. Various elements in the course. would be added to accommodate the project, which could then be worked on by one or two students in a special topic.

Angard has emphasized the value of independent work in a scientific education, and he feels that a more pro-
