Rule Says! Probably Relax Discipline
As MIT Tends To An Academic Community

The discipline placed upon the students has relaxed in the past few years and this is true in this direction. Dean Dale organized MIT's belief that the student should have freedom to learn how to make decisions by making his own wise and selfish decisions. With this emphasis increased the Institute for the body of discipline education.

The decrease in the ethics of the student is one of the problems to be dealt with by Dean Dale. This problem is to be handled principally by the student Judicial Council and Finance Committee on Discipline. Dean Dale's position is to remain the students in this line, but not to do anything to make discipline.

The relaxing of the rules implies that the student is learning something more and the student himself.

Dean Rule said, "We are interested in getting students and helping them in student affairs." For understanding the students of the student affairs who are showing "good guys" is one of the Dean's major objectives. The job here is one of development, much better communications between the students and the Institute so that they better understand each other and work together.

Creating a true academic community with the community atmosphere is the prime goal of the Dean's effort. The problem here is the implementation of the Reyer Report in the dormitories. Along with this problem, a student group of at least three or four graduate students will be able to act as representatives of the students. A new dormitory, if it is not joined, will become a true univer- sity in every sphere, academic and non-academic.

Mc Cormack, New Vice-President, Is A Man Of Great Distinction

General McCormack's record is as distinguished as that of the men who have preceded him, Vice Admiral Edward L. Hagan. McCormack attended the U. S. Military Academy and has had a long and distinguished military career. He was graduated from West Point in 1932. Later he attended Oxford University as a Rhodes Scholar and finally took the degree of master of science in civil engineering. During the war General McCormack served with the 12th Army Group, a conduct scientific analysis work for the Air Force.

Currently in Texas, General McCormack is due to return soon. Then he will be sent by MIT, and given the job of organizing a new division between educational institution and government and industry.

LECTURES

The Department of Geology and Geophysics announces a series of three lectures entitled "The Technical Conductivity of the Earth," by Dr. Harry King. These lectures will be held in the Geophysical Laboratory, MIT, Monday, October 4, 7:00 p.m. Monday, October 11, 7:00 p.m. Monday, October 18.

Bexley Hall Coed Residents Meet; Set Up Dorm-Like Organization

After a good deal of discussion, the coeds from Bexley Hall were given a chance to form a community with one member from each floor plus a drillsie at large.

At this point, the girls succeeded in electing representatives. They are: Mary Ann McClung, 1st floor; Linda Greener, 2nd floor; Jane Holz and Ann Baker, 4th floor. After reconvening, the entire group elected Gus Hovick as delegate at large.

The Junior Honorary Society, Bea-

ton in this line, but not to do anything to make discipline.
