Five Days In Bed

If you have ever suffered from a head cold, your reaction to the following is probably predictable. Dr. Harold A. Hardy, director of the Medical Department who was in charge of the health of students during the four days they were away from MIT, has an interesting story to tell.

Dr. Hardy's report is to the effect that 490 students were affected to the extent of being confined to their rooms for five days. The health authorities have been informed of the situation. Hardy estimated the number of days students were away to range from twenty to fifty. Staff members in the dormitory who have been affected by the flu, have not yet returned to work.
