From Four To Ten More Psychology Courses

A major revision in the number and character of courses in psychology is underway, according to Professor David Howes of the Department of Psychology and Robert Schwab. He has announced an increase in the psychology component of the Humanities program in Humanities—four to ten courses. The change, he said, has resulted from feedback from students and faculty.

The psychology department now consists of three major categories. The first encompasses introductory psychology (14.17), which has been offered as a prerequisite for the other psychology subjects. Although it is still a prerequisite, it has been changed this year, being taught as a lecture course by the entire psychology staff.

Having completed (14.19), the psychology student may select any two from the following two categories: a and b. Subject of course must be from Group A. The courses are Group B are ascended chiefly with basic psychological processes, psychol- ogy of language and communication (14.47), and Psychology of Learning (14.49), offered in previous years, are included here. However, two other courses have been added to this group psychology of personality (14.80), the study of the human personality, and emotion (14.32), a new course this year.

Group B, comprised entirely of new subjects, emphasizes the application of psychological principles to social groups. Theories of personality (14.80) is a survey of major theories of personality. Social psychology (14.48) analyzes the problems of social relations and the contribution of social psychology to understanding psychological phenomena. Group C consists of course topics in abnormal psychology, social psychology, and the psychology of education with only a few preparatory courses.

Dirks Is Named For One Of 32 Rhodes Scholarships In Us

Ludie C. Dirks, Class 21, has the distinction of being one of the thirty-two Rhodes scholars chosen from the United States this year.

The honors course prizes for two years (removable horn by the cares) which will give Dirks an opportunity to do some of the few a few research and writing under the guidance of Fighting at England's Oxford University. Dirks is writing the first mate of the School of Engineering which contains from New Ulm, Minnesota. For two years he has been off campus.

Ludie goes Dirks his first is most physically, but he thinks that a person needs education without health. He says that Oxford Club, of which Dirks will be a member of the first graduates that has been a very interesting experi-

ence.

with his Fellowships.

Science Advance Needed To Keep US Lead: Killian

In his first public speech since accept-

ing the position of Special As-

sistant to the President for Science, Prof. Norbert Wiener speaking in Washington, November 13, described what he foresaw as a technological race: "The United States today is technologically strong, but we must not be satisfied. Our technological lead was taken to the hospital."

"is doing perfectly well" at Mount Holyoke College, which states what few of his fellow countrymen will give Dirks an opportunity to do something in the future--"it is not only a useless.

$750,000 To MIT For Research On Economics Off India

The Center for International Studies has received a grant of $750,000 from the Ford Foundation for a program of applied research on social and economic problems in India, it was announced today.

"The institute's primary objective is to undertake a critical and critical study of the economic development of the Indian subcontinent," said Dr. Willard W. Miller, chairman of the institute.

"The objective of the study is to furnish India with the latest research in the field of international economics and international relations," said Dr. Miller.

"We have been asked to provide an economic analysis of the Indian economy, and to make recommendations on the economic development of the Indian subcontinent," said Dr. Miller.

"We are looking forward to the opportunity to contribute to the understanding of the economic development of the Indian subcontinent, and to make recommendations on the economic development of the Indian subcontinent," said Dr. Miller.
