Two People Saved from River by MIT Student in Thrilling Rescue

A motorized Boston driver, a young woman, suffered a heart attack and was suddenly overcome at the wheel of her automobile. The car skidded out of control, careening dangerously along the roadway, and hurtled swiftly into the Charles River. The driver fell dead, the engine still thundering, and the car plunged into the water.

It was then that Robert A. Lang, a student in the Mathematics and Mechanics Institute and an instructor in fresh-water fishery biology at the Cambridge Biological Laboratory, seized the opportunity. darting into action. 

The graduate student, a former member of the Cambridge Rowing Club, leaped to the car as it hit the water, just as the tide was flowing gently down steep waters. He then picked up the other veterinary student and ferried both people to safety.

Why did Bob Lang endanger his life and health in this hopeless effort? He said: "I felt that someone had to do it—so I went in."

The New England Salero Hotel was incorrectly attributed to Barron Sheftel '35 in the last issue. Actually, Barron was the full title.

WTBS Open House Will Be Held Sunday; All Students Invited

WTBS's last membership drive before becoming an FM studio will be highlighted this weekend by Open House tomorrow and Sunday at their facilities in the basement of Ware in East Campus. Undergraduates and grad students alike are invited to attend. Since a drive for more publicity and advertising in some to be inaugurated, personnel is particularly needed in these departments. There are spots available for would-be announcers in the popular, classical, jazz, news, sports, and campus affairs departments, and also positions on the engineering and technical staff. In addition to the usual Open House proceedings, there will be a special program conducted to demonstrate to those who come a size of the air.

SQUEAK! SQUEAK!

The Mickey Mouse Club of East Campus announced its annual membership drive, Sunday, March 9th, at 3:00 P.M. in Crafts Lounge. Prospective candidates and interested listeners are welcome to participate in our hospitality.

HARVARD SOCIETY

The American Society will hold a meeting with representatives of the Administration and the Corporation to discuss the problem of raising tuition and financial assistance. All new members inducted at past pledge meetings will attend.

News of Campus Activities

The Washington Post reported that between 400 and 500 members of the American Physical Society met here last Friday for a one-day meeting with representatives of the American Physical Society and the Academy of Science.

The meeting, which was held in the lounge of the Hotel Savoy, was attended by approximately 200 students and 100 faculty members from various institutions throughout the country.

The agenda included discussions on current research topics in physics, as well as a panel discussion on the future of physics education in the United States.

In addition to the formal presentations, there was a wide range of informal interactions among the participants, including evening social events and a tour of the city.

The conference was well-received by the attendees, who praised the opportunity to connect with other professionals in the field and stay updated on the latest research developments.

The organizers plan to host similar events in the future, with a focus on fostering collaboration and networking among the physics community.
