Cosmopolitan Campus is Fostered
By Students from Other Countries

Richard K. Chang '61, one of four typical foreign students who, in the eve of International Week, why they came to the Institute. "The reputation of MIT is no doubt a contributing factor to its student body," said Chang.

Lima, Peru. Unlike Chang, Novak, who was born in China, migrated to Japan in 1940 and then moved to Lima after the war, had heard about MIT and was told that the education at MIT laid a very firm foundation in science and technology which could be adapted to suit the environments of different countries and political backgrounds.

Allen Novak, who was graduated from a high school in Canada, feels that there is a type of education at a high school in Canada. Allen knew practically everything of MIT from his college days in Switzerland and did not need much help after the first week of classes, including an association with Professor J. S. Muirhead whom he termed "striking rich," and a certain episode in a wine cellar. When he repeatedly mentioned the prevalence of drinking, he was rewarded with a "smile and a shake of the head." Professor Muirhead disclosed that he is writing a book about optics and is on the lookout for a few more copies of existing books on the subject.

It will contain "laws of optics" analogous to Maxwell's equations in electromagnetic theory and to Newton's Laws in mechanics, as opposed to present day books which positulate theories. Professor Muirhead fell the phrase "a period of transition until that the simplicity and order in classical physics will be regained.

SEXY Electron Chris will meet this Saturday at the Dake house at 4:30 p.m. to do research on the pleasure to be derived from alcohol.

CONCERT BAND
The MIT Concert Band will give its annual Spring Concert this Saturday evening in Kresge Auditorium. The performances is scheduled for 8:30 p.m.

Everyone interested in trying out for the concert should report to the Rockwell Cages any day this week at 4 p.m.

Our interviewers will be here
TUESDAY, MARCH 25th

M.I.T. GRADUATES
OFFERS UNUSUAL OPPORTUNITIES TO

Con Edison wants men who can grow fast... men who can prove their ability and move ahead to increasingly important staff and management jobs.

Con Edison will spend $750,000,000 in the next five years— which includes the construction of a 275,000 KW nuclear reactor power plant at Indian Point in Westchester County— to expand and improve its electric, gas and steam services.

Con Edison has 807 top staff and management positions. 90% of the men now holding these positions must be replaced in the next 15 years because of retirements and other attrition.

Over 250 of these vacancies will be filled in the next five years.

Our big construction program, together with management attrition, spell truly exceptional opportunities. We have interesting jobs—and progressively better ones—as you qualify.

Your Placement Office has copies of our brochure.
