Hellenophiles March at Noon Tomorrow

Dorm Dwellers Will Holiday Away From Campus Pillars

"Holiday Trio" gets underway at 8:00 this evening when Herb Reynolds gives the downbeat to start the semi-formal dance. This will signal the beginning of a full round of festivities which will mark the 1958 Dormitory Weekend—a weekend on which the commuting students have also been invited.

The Bay State Ballroom of the Statler Hotel will be something like a Junior from Weekend, but with the added attraction of having it all on its own campus. The Dormitory Weekend function will be held off-campus. The committee in charge also looks forward to "insisting on something new" in the way of the "south of the border" selections, bongo drums will be used for accompaniment.

Fixtures will be held Saturday evening as the dance band of Bob Adams provides the music for an informal change in the Baker House Dining Hall. Drinks will be included in the $2.50 admission price. tickets will be on sale at the door, and again all are invited. Door prizes will be the scene of the semi-formal. Music will be presented by the IFC to the house that accumulates the greatest number of points. There are events scheduled until 5:00 to replace that which was lost, three cocktail parties (Continued on page 1)

Panelists Find World in Danger of Annihilation due to E-W Conflict

Dr. Leo Szilard was one of the high-profile scientific luminaries who attended the annual meetings of the American Association for the Advancement of Science conducted this weekend in Boston. During his speech, Dr. Szilard discussed the possibility of an atomic war, stating that the world was on the brink of destruction if something was not done to prevent it. He emphasized the need for international cooperation and peaceful resolution to avoid a catastrophic outcome.

The question, "Is there a way out of the Cold War?" received three widely differing answers Wednesday at a TCA Seminar. A high Whitman Rostow, Professor of History at Harvard, argued that a policy of economic development and cultural exchange could be effective in reducing tensions. Louis B. Stimson, who served as Secretary of War during World War II, was more pessimistic,认为 there was no way out of the Cold War. The third viewpoint came from Dr. Leo Szilard, who believed that international cooperation and peaceful resolution were the key to preventing a catastrophic outcome.

At the TCA Seminar Tuesday (left to right): Professor Whitman Rostow, Professor of History at Harvard; Professor Louis B. Stimson, who served as Secretary of War during World War II; and Dr. Leo Szilard, a physicist and author of the atomic bomb.
