Radium Poisoning Victims Sought
Evans Conducts Radiation Studies

Recently a small advertisement appeared in the front page of Sunday's New York Times. It read, "University research center looking for subjects to receive radium or radiation. Painless experiments, no risk, just radiation. Pay offered." The advertisement was placed by the Radioactivity Center directed by one of the nation's foremost authorities on the subject. The center, which is located in the heart of Manhattan, has attracted the attention of scientists and laymen throughout the country. The center's director, Dr. Robert D. Evans, is well known in medical circles for his research on the effects of radiation on the human body.

The center is currently conducting experiments on the effects of radiation on the human body. Subjects are selected on the basis of their medical history and the results of preliminary testing. The experiments are designed to determine the long-term effects of radiation on the human body. The center is also conducting research on the use of radiation in the treatment of cancer.

The center's director, Dr. Evans, is a leading authority on the subject of radiation. He has published extensively on the subject and has been a frequent lecturer on the subject at medical conferences. He has also been a member of the American Medical Association and the American Society for Experimental Biology.

The center is currently seeking new subjects for its experiments. Those interested in participating in the experiments should contact the center at the address below.

123 Main Street
New York, NY 10001

Dr. Robert D. Evans
Director
Radioactivity Center
