Holmes Chosen Man Of The Year by TCA for Service to Community

Holmes 28 has been chosen man of the year by TCA for his service to the community. This is the first year ever that a man has been chosen for this honor. Holmes is a senior at MIT and has worked hard and dedicated himself to the welfare of the community. He has been an excellent role model and has set a high standard for others to follow.

Incomm Disclaims Liability for Students' Court Costs

Incomm has disclaimed liability for the court costs and legal fees of MIT students arrested during the March for the Equal Rights. Incomm has stated that the company was not involved in the planning or execution of the March, and that it had no knowledge of the arrests. Incomm has also stated that it is committed to the cause of civil rights and that it will continue to support the efforts of those who are working towards a more just and equal society.

1000 Fellowships Given by National Science Foundation

For the first time ever, the National Science Foundation has granted 1000 fellowships to students for graduate and postgraduate study in the sciences. This is a significant increase over the previous year, when only 500 fellowships were granted. The fellowships are awarded to students who have demonstrated exceptional promise in their academic pursuits.

Seven Students Here to Teach in High Schools in Harvard Program

Seven students from MIT have arrived in the city to teach in the Harvard Program. This is a new program that has been established to provide additional educational opportunities for students in the community. The students have been selected for their academic excellence and have been given the opportunity to teach in a variety of subjects.

Inspection of Effect, Marchers Hope for Political Arousal at Institute

The students who traveled to Washington for the March for Civil Rights were greeted with a disappointing inspection of the effect of their trip. While they had hoped to arouse political awareness and action, their hopes were dashed when they arrived back at MIT. The students are now hoping for political arousal at the Institute to address the problems they have encountered.

Lincoln Devises New Transmitting Method for Long-Range TV

A technique for transmitting television signals over long distances has been developed by Lincoln Labs. The method involves the use of microwave relay stations, which allow signals to be transmitted over long distances. This technique has the potential to revolutionize television broadcasting, as it will allow signals to be transmitted over long distances without degradation.

Times Movie Critic at LSC Tomorrow

The first Lecture Series Committee of this year will feature Jack Kroll, film critic and movie producer. Kroll will speak on the role of the critic in today's media landscape and will discuss the challenges faced by critics in today's fast-paced world. This is an excellent opportunity for students to learn more about the world of film criticism and to engage with a prominent figure in the industry.
