Sophomores Easily Win Boat Race Prizes But Are Overpowered By Frosh Strategy In Other Events

Frosh Boat Builders Attack Own Officers

In an open letter to the Froshman Chums, three members of that frosh boat committee who worked on the Junior Class boat, wrote that they had received a summons to appear before the court of the Junior Class to answer charges filed against one of them. The three, who were not identified, said that they had been asked to appear before the court because they had been accused of having made a mistake in the construction of the boat. They denied that they had made any mistakes and said that they were determined to win the race.

The junior class, which had been expecting a close race, was disappointed when the frosh won by a large margin. The frosh boat, which had been designed and built by the junior class, had been expected to win, but the frosh, who had been working on the boat for several weeks, had been able to make some improvements that the junior class had not been able to make.

Rivkin Reviews Long-Range Plans Of Institute at Insec Meeting

Mr. Malcolm Rivkin, Institute Long Range Planning Officer, recently presented the Institute's long-range planning program, which is designed to ensure the continued growth and development of the Institute.

The program is divided into three phases, each of which is designed to meet a specific need of the Institute. The first phase, which is designed to meet the needs of the first five years, is aimed at providing the Institute with the facilities and resources necessary to support its growth. The second phase, which is designed to meet the needs of the next five years, is aimed at providing the Institute with the facilities and resources necessary to support its growth and development. The third phase, which is designed to meet the needs of the next ten years, is aimed at providing the Institute with the facilities and resources necessary to support its growth and development.

Expansion Symbol

The Institute's expansion symbol is designed to represent the Institute's growth and development. The symbol is a combination of the Institute's name and its logo, which is a combination of the Institute's name and its logo. The symbol is designed to be easily recognized and to represent the Institute's growth and development in a meaningful way.
