MEET ME UNDER THE CLOCK
Weekends and the holidays are so much more fun
in N.Y. if you stop at The Biltmore, traditional favorite
on every campus in the N.Y. area.

Write to our College Department for special student and faculty rates and reservations.

THE BILTMORE
110 Madison Avenue at 52nd St., N.Y. 17, N.Y.

Other BEAUTY HORTS: The Barvick & Park Lane
Harry M. Ashby, President

The Gift Horse
I know how busy you are—studying, going to class, catching night crawlers—but let's insert your mundane activities—studying, going to class, helping old gramps find their dentures after Homecoming—to remind you that busy as you are—studying, going to class, helping old gramps find their dentures after Homecoming—there's still time left for the holidays. Indeed, you will need the supplemental time and leisure to do the following:

- Study
- Class
- Shopping for Meat
- Practicing for Homecoming
- The Amazon (Continued from page 1)

YOUR GIFT PROBLEM IS NO PROBLEM IF YOU GIVE MARLBOROS IN YOUR LISTER SMOKING FRIENDS AND PHILIPS IN YOUR NON-LISTER SMOKING FRIENDS AND MILTON MARRA IN TOP HAT OR TOP-HAT BOX: BOTH ARE MADE BY THE SPONSOR OF THIS COLUMN.

FOREIGN EMPLOYMENT

Service Available to US College Students
The American - European Student Foundation is offering summer jobs in Europe for those American students interested. Real lining contact with the average people of the countries visited is offered the student along with the employment.

The Student Foundation, an international non-profit organization, is cooperating with the People-to-People program initiated by President Eisenhower. The Program, begun last year, offers the student not only the opportunity of a trip abroad but an unforgettable experience in living.

Available jobs consist of forestry work, child care (female only), farm work, construction labor, and other jobs requiring more specialized training. These employment opportunities are available in Germany, Scandinavia, England, Austria, Switzerland, France, Italy and Spain.

The working conditions in the various countries will be strictly regulated by the labor ministries of the nations involved. In return for their work, the student will receive his room and board, plus a wage. However, students should keep in mind that they will be working on the European economy, and wages will be scaled accordingly.

This year the Foundation will obtain voyage tickets at a 10% reduction.

HOLIDAY CHEER
President and Mrs. Stratton will give their annual Christmas "At Home" for all students remaining on campus on December 22, from 4 to 6 p.m.

SKEPTICS SEMINAR
The Skeptics Seminar for December will be held in the Library Lounge at 5:00 p.m. today, Professors Bancroft and Salter will lead a discussion on "Creativity in the Arts and Sciences.""THE ALCHEMIST"

Ministry of Higher Education.

"A long range plan covering a period of five years (currently seven years) has been initiated. Each year, this master plan is modified to take into account the accomplishments actually achieved the previous year. The plan considers the needs of the whole Soviet Union in the light of the expansion of industrial plant capacity, the need for replacements, and the replacement by professional people of non-professional personnel not adequately trained.

"The seven-year plan now being formulated contemplates that an average of 250,000 graduates in all professional fields (engineering, science, medicine, languages, etc.) will complete their training each year. This is an increase of 45% over the average of the past seven years, but in engineering it is proposed that the increase shall be 400%.

"The master plan specifies the number of each who may enter the institutions of higher education, the number who may train for each field of specialization, the quota of each specific institution for each specialty, and the jobs which will be available at the time of graduation. Each planning demand that each student (at present upon graduation from the ten year school at the age of 17 or 18) must choose irreversibly a narrow field of specialization when he applies for admission to college.

APPLICATIONS
The deadline for the full-time day program is five or six one-half year courses, which are coordinated and planned in cooperation with the various universities in various countries. A minimum of 2,000 students are sponsored by the People-to-People Program which has arranged for their tour of American colleges and have complete their training each year.

APPLICATION STRESS
The report notes that, "the young Soviet engineer is well grounded, trained with principles and prevailing practices in his specialty."
