Ivory Tower

With the second returning to school this February MIT is thrust into the heady of the campaigns for the various undergraduates elected offices. But MIT is not thrust into the political battles. Rather the skirmishes sweep upon this academic community with a great rustle of paper hanging as the gospel of Tom, Dick, and Harry is preached from that must oft seen of places: the inside of the head door.

MIT seems to have neither the mass rallies and football atmosphere of some campuses nor a mass rallies and football atmosphere. Instead a great sanctuaries of contemplation and solitude. Instead a great many, show a mild interest in the student affairs. Instead a great many, show a mild interest in the student affairs. Instead a great many, show a mild interest in the student affairs. Instead a great many, show a mild interest in the student affairs.
