MIT Band To Play Open House Concert
3:30 p.m. On Kresge Auditorium Plaza

When the drums go bang and the cymbals clang, there's nothing like a live concert to bring outdoor activity to the MIT Band. The band will be playing an outdoor concert 3:30 p.m., May 3, on the Kresge Plaza.

The MIT Band, a band of the leading girl's schools in the vicinity, will consist of 65 members and will feature an evening of fine music with the Boston Pops, its first appearance in Boston and the neighborhood communities.

The Tech Model Railroad Club will feature an evening of fine music with the Boston Pops, its first appearance in Boston and the neighborhood communities.

MIT President Stratton

By Sam Bolt

Dr. Julius A. Stratton will be inaugurated as the eleventh President of the Massachusetts Institute of Technology on Alumni Day, June 15, 1959, which according to tradition will be the Monday following Commencement on Friday, June 11.

Though Dr. Stratton's appointment was announced on June 1, 1958, the invariable conference will be held at this time with Dr. James R. Killian, chairman of the Corporation, presiding. It will be held on the Great Court at 11 a.m. before an audience of corporation members, faculty, students, and guests.

Following the inauguration there will be dinner, at which time the new president will speak. Speakers will include President Nathan M. Pusey of Harvard University, President Lee A. Bridge of California Institute of Technology, President Charles O. Handy of the University of Washington, which Dr. Stratton attended for one year, and Claude S. Hill, vice-president of the board of Dallas Federal Institute of Technology under the direction of Richard Burgin, will provide music for the ceremony.

As President, Dr. Stratton is charged with the task of administration of the Institute's great scope of activities, which range from the education of undergraduates to the front lines of national defense. And besides these administrative duties, he also has the great responsibility for "keeping a constant eye out" for the maintenance of MIT's position as a world center of science, technology, and culture in the future.

Dr. Stratton is a member emeritus qualified for his position. He is a scion, engineer administrator, and community-minded citizen of the highest caliber. Himself a graduate of MIT, he has been a leader in the field of electrical engineering and physics. He was one of the outstanding so-called rocket boys in the field that has come to be known as electronics.

In recognition of his service he was awarded the Medal of Merit by the Secretary of War in 1944, and a Certificate, awarded by the Secretary of the Navy in 1957.

As President, Dr. Stratton succeeds Dr. James R. Killian, a figure of national stature in science and engineering, who has also been engaged in adjusting the nation to the impact of the atomic age since arriving in Washington as special assistant to the President of the United States.

Dr. Stratton is a figure in the concept of "education for utility" who has made such an important concept at MIT.

The Institute, according to President Stratton, provides a must with a "professional undergraduate education" and "high-level research involvement," and if he has learned that anything falls from the Hamann's, he may expect Gratian's, a personal selection approach to the student body.

President Stratton repeatedly expressed the concept that the problem is what field he eventually enters into, "the will be prepared." In his recent address to the student body, President Stratton repeatedly expressed the concept that the problem is what field he eventually enters into, "the will be prepared."
