Brown Named New Dean of Engineering; Soderberg to Become Institute Professor

Booth Moved Twice; Voo Doo Fails to Sell

The stenographers of Voo Doo have been found to have no need for the room, so the stenographers will move to the newly vacated room. The Voo Doo sales will continue as usual.

Kresge Draws Open House Crowds

Dormitories have been opened in preparation to move Dorm Weekend from the campus. The dormitories will be open from 10 a.m. to 10 p.m. on Friday and Saturday.

Brown Named New Dean of Engineering; Soderberg to Become Institute Professor

Move Signifies New Emphasis on Science

Barry Bozich, '60

President Julius A. Stratton announced yesterday that Dr. Gordon S. Brown, Dean of Electrical Engineering, had been named New Dean of the School of Engineering. Dr. Brown replaces Dean C. Richard Soderberg, who will become President of the Massachusetts Institute of Technology.

Dr. Brown is noted for his revolutionary vision of the electrical engineering curriculum in order to give students extensive grounding in basic and applied science.

The appointment of the new Dean of Engineering heralds the growing importance of science in the engineering education curriculum.

As if this philosophy would affect the entire engineering department, Dean Brown said, "We believe it is essential to offer other departments, although it will certainly take time. Of course, different departments will follow different routes in carrying out this program."...
