SCEP Reports to Incomm
ON Foreign Summer Program

Last week Student Committee on Educational Policy presented a report officially dropped plans for an organized program of summer work in Europe for Tech students which had been under their consideration almost a year. SCEP decided that any organized program would need to be limited to the summer of 1960 and recommended that students apply through departmental programs and individual arrangements with professors.

MIT dropped out of the Foreign Student Summer program in 1954 because of placement problems. Each student sent to Europe had an European counterpart in this country, whose qualifications were not under the control of the Institute.

In the fall term of 1955 SCEP communicated with Mr. J. Grant, newly appointed chairman of the International Cooperation Society. However, Mr. Grant later discouraged any more for employing Tech students, as he felt trained workers were better for improving foreign relations. The ICA planned to help those sent to serve as foreign ambassadors as well as technical engineers.
