Black Market on Options Revealed; JP Heads Mum on Questioned Sales

While numbers of dormitory men were left holding two dollars and no JP options, social chairmen of several fraternities negotiated with members of the Junior Prom Committee to buy more than 20 options — allegedly under the table. Over 20 options were sold late Wednesday night.

Committee Chairmen John Elliott and Committee Member John Di- bow called on several fraternity houses late Wednesday night after more than 400 options had been sold on the first day of option sales. These committee members were not present at the time, however, and were not told by their former fraternity brothers that options were being sold.

IFC Considers Violations

Investigations Committee of IFC reported action taken on three Rush Week violations at IFC meeting last week. Punishment and identity of one house was released at the meeting.

The three forms of penalties are censure, monetary fine and publication within IFC. Joe Verderell, '60, IFC President, stated that publication to the IFC was very separate and distinct from publication to the MIT community.

See Editorial Page 2

Punishment of one house was a closed decision of the Investigating Committee according to Ken Richardson, '60, chairman, and the house's identity was never released even to the IFC. Possible punishment of the third house was open to any member of the IFC, as none of the houses were given a punishment of general publication.

The movement to oust Welch has gained momentum in the Dormont Council. It is well known that Welch believes the Council to be a total waste of time and that he already has attended a meeting, a fact for which he was reproved by Dormont. Welch did not deny that Welch had a lab report at the time and that he might have been late to the meeting. At the House Com- mittee meeting last Wednesday night, Welch and Johnson reported that Welch had no lab report at the next day and that he could not be at the meeting. At the House Com- mittee meeting on Wednesday, Welch and Johnson reported that Welch had no lab report on the next day and that he could not be at the meeting.
