Harriers Get Ready To Fly to Illinois For N.C.A.A. Meet

Varsity cross-country coach Art Parmalee hasn't specifications. His thirteen-man squad will fly on Friday, November 13th, to Wheaton, Illinois, for the second annual N.C.A.A. College Division Cross-Country championships. Fearing no whammy, MIT's "Thrifty Thrushes" will be the first New England entry to compete in this international competition hosted by Western College.

The race will be run one week from today over a four-mile course of the Chicago Golf Club.

Yesterday the harriers faced Tufts and Northeastern at Founder Park in their last regularly scheduled meet.

Monday, this top team from both the varsity and freshman squads will compete in the New England Championships, also slated for Franklin Park.

MIT Sailors Place 3rd in Hoyt Regatta

Judges Break Tie

In the season's closest sailing competition, Coast Guard nipped MIT all Brown to win the Hoyt Trophy Race last Sunday at Providence. The victors ended the afternoon with a point, two ahead of the Bears and home squad. However, Brown had no more first place than MIT, and so awarded second place even though each team had beaten the other an equal number of times.

Throughout the afternoon, the lead shifted among the top three. In the seventh and final race, a big wave with rate and winds up to 20 m.p.h. caused interference between the three fleets of boats that were on the way at the same time. After two hours of deliberation following the end of the final race, the race committee decided to throw out the results of the race in each division. If this race had not been disallowed, MIT would have tied for first with Coast Guard.

Sailing for MIT were Pete Gnei, '61, skipper, and Chuck Glueck, '61, crew; in "B" Division, and Gary Hellinger, '62, skipper, and Chuck Glueck, '61, crew, in "B" Division.

Freshmen Individuals

In the Finals of the Four New England Individual Championships Sunday, on the Charles, Herbert Wegenet, '61, skipper, and Chuck Glueck, '62, crew, was the winner of the "A" Division. The Junior, and Gary Glueck, '61, skipper, and Chuck Glueck, '62, crew, of the "B" Division.

VOO DOO

We know that if you're reading this you probably won't have a chance to appreciate the wonderful humor offered in VooDoo, but you should at least take the time to look at it. It's a nifty little piece of entertainment that will make your afternoon all the more enjoyable.

You get your "welcome home" bug hours sooner—in today's jet age. And the jet age itself arrived here sooner, thanks in part to a special oil developed by Esso Research. Every jet engine throughout the free world grew up on it. And most pure jets flying today still use it and it alone. For happy homcomings or "happy motoring"... Esso RESEARCH works wonders with oil.
