Neuman Praises Hillel Work Here

(Continued from page 5) explained this as a force of destiny running through history, keeping the nation alive.

Answer for World

Citing a speech by the English statesman Balfour, Dr. Neuman said that the world was approaching a “blind alley,” and asked whether some new message or new faith was needed. He noted that 2,000 years ago, when Christianity arose in Palestine, the Jews in Greece were in a position to translate the Bible and transmit it to the rest of the world. He then said that a “new creative force” was rising in Israel, and that it may well be the purpose of American Jews to translate this new knowledge to the world. In his words, to be a “blinded carrier.”

To this end, the American community must steep itself in both the Western and the Hebrew cultures.

Dr. Neuman was introduced by Dr. Bernard Gould of the Biology Department. The program was under the direction of Paul Jambison, ’50, and Jeff Losey, ’62. About 200 people were at the lecture, 60 of whom attended the supper.

There’s opportunity, challenge, and excitement at Convair!

The widest diversity of missile and aircraft projects in the U.S. assure Convair of a continuing program of research and development . . . a challenging and exciting program that offers unlimited career opportunities to young scientists and engineers in many fields.

Talk with the men from Convair (see dates below). Ask about the extensive opportunities Convair offers for training . . . for continuing education . . . for personal advancement.

CONV AIR San Diego
As an engineering or science major, you will soon make one of the most important decisions of your life: Choice of Association. We hope you will choose Convair San Diego, but whatever your choice, the selection of association must be made with utmost care. Our representatives have a new book which describes the work of each group within the Association. We hope you will choose Convair-San Diego, but whatever your choice, the selection of association must be made with utmost care. Our representatives have a new booklet which describes the work of each group within the Association. We hope you will choose Convair-San Diego, but whatever your choice, the selection of association must be made with utmost care. CONV AIR Astronautics

Convair-Astronautics' great new $40 million facility in San Diego was created solely for the purpose of putting America first and furthest into space. Here, graduates will participate in the research of man's next missile, the Atlas ICBM, which powered the biggest satellite into orbit. Other programs involve lunar and interplanetary exploration. Many members of our staff rank among the world's leading authorities in their fields—distinguished scientists and engineers to direct your career progress. We urge you to discuss your future at Convair with us.

CONV AIR Pomona
New programs at Convair-Pomona offer excellent opportunities today for engineers. Convair-Pomona created the Army's newest weapon, Redeye shoulder-fired missile, and developed the Navy's advanced Terrier and Tartar missiles. Many other programs, still classified, are at various stages of development, providing stimulating assignments for progressive-thinking engineers and scientists. Positions are open for Bachelor's, Masters and Doctorate candidates in electronics, aeronautics, mechanics and physics.

POMONA, CALIFORNIA

CONV AIR Fort Worth
Latest project to emerge into the stages of flight test and production at Convair Fort Worth is the B-56 — a long range supersonic bomber, first aircraft to be built under the "weapon systems" concept. Nearly half a-hundred other Air Force contracts are in various stages of design and development. In addition to working in this atmosphere of advanced thinking, you'll find better living at lower cost, and enjoy a wealth of recreational and cultural facilities in Fort Worth.

FORT WORTH, TEXAS
