ICDS Big Leap To Feature Stanley Silverman's BU Quartet

Above is the King's Men on stage in Boston.

Bob Huff, '62, Chairman of the IDC, and Ron Stanton, '62, Secretary-Treasurer of the IDC, announced that "The Big Leap" acquaintance dance to be held February 19, in Walter Memorial, will feature a musical quartet, the Boston University Kingmen, joined by vocalist, Hank Dolin.

During the summer of 1958 the Kingmen were engaged for two weeks at the Brussels' World Fair as part of a tour of Europe. In conjunction with this tour they appeared on NBC's "Monitor," "Today," and "Outlook" and many European networks.

The Kingmen are led by Stanley Silverman, a senior at the Boston University School of Fine and Applied Arts, who has composed the scores of several musicals and whose first album, "Guitar, Foreground and Background," will be released in April.

Hank Dolin, the group's vocalist, also a senior at the Boston University SFAA, has had much TV and concert experience. He has worked under Charles Munch, John Herdorff, and has been featured in many concerts, both serious and jazz.

The Other members of the group are Allen Hovey, Charles Costa, and David Sutphin, all from the Boston University SFAA.

tempts in dealing with this situation.

I personally suggest an investigation of systems now in use in other schools with similar dining facilities in order to determine the possibility of an alternative plan. If requested by the autonomous houses, I would appoint a sub-committee to consolidate their separate work into a report formidable enough to be considered seriously and acted upon by the administration.

I will also strive to gain acceptance of certain questions concerning educational policy, specifically those which deal with the acceptance of the fact that undergraduate class average approaches "B" in many schools equal in reputation to MIT.

In the area of coordinating and leading Institute Committee, I believe that an effective and forceful chairman must not only administer but also introduce new ideas to the committee. The duty of seeking out problems, formulating these, and leading the discussion of these solutions is squarely on the shoulders of the UIDC. This situation is due to the reorganization of the Institute Committee two years ago, which is now composed of several of the busiest student officers on campus.

Finally, with regard to representing MIT to the general public, you must choose the person you feel would best represent you. Therefore, I will attempt to meet as many of you as possible so that you may form your own personal judgments.

C.L. Hampton

Computer expert Chuck Hampton is a man with problems.

As head of our Aviation Division's Computer Applications section, Hampton pits his analog and digital computers against the mathematical intricacies of infrared research, optics, spectral background studies, feedback control and weapon system design. At 30, with a BSEE from the University of Illinois, Chuck Hampton is a Senior Engineer. He typifies the progress made at Aerojet by younger men of technical distinction, in electronics and many other areas.

We think the challenge is imposing and the opportunity impressive.

Our Aerojet-General representative will be on campus to discuss employment opportunities with you on Feb. 24, 25, & 26. Contact the placement office for details.
