Centennial Plans Revealed; Events Scheduled All Year

MIT today unveiled its Second Century Program for broad advances in education and research to help “fulfill its national responsibilities.” In support of this program the Institute is seeking funds totaling $66,000,000, of which $23,000,000 has already been contributed previously. The announcement was made jointly by Robert A. Millikan, president of the Institute, and Dr. Julius A. Stratton, president. Solicitation for special gifts will be conducted during coming months. An appeal to 48,000 alumni, to industry, foundations, and to the public will be made in the coming months. The centennial will be held on April 2 through the week to its climax on April 10th.

Aldous Huxley Will Lecture at Institute

Aldous Huxley, one of today’s most penetrating and important writers and philosophers, will be a visitor of the faculty of the Massachusetts Institute of Technology during the fall of 1961, President Julius A. Stratton announced today.

An English novelist who is well known not only in the United States but also in the United Kingdom, Mr. Huxley has accepted an appointment as Visiting Professor of Humanities for the fall term.

Mr. Huxley’s lectures at MIT will in part adhere to the theme of “Reality and Illusion Contrast” which will be the keynote of his visit. His talks and discussions will be devoted to broad issues involving education, science, technology, and politics.

His name is disclosed. He is accused of being a member of Communist Party. The trial is continuing.

The Massachusetts Institute of Technology of the future is shown in this photograph of the new $66,000,000 Science Center for MIT, left and right. The Center, which will house the more than 2000 students who are the students of the Institute.

The $66,000,000 represents the minimum needs to meet its re-

Worlds' Problems Discussion
Calling April 7, there will be a day series of discussions and workshops to consider the future of the United States and the world. The discussions will be taken on by several groups of the Department of Mathematics, Physics, and Astronomy, which will address the opening of the conference.

World's Problems Discussion
An important issue that has been raised in the past is the question of man's role in the world. This question has been raised in the past by scientists and philosophers, who have argued that man has a special responsibility to the world.

World's Problems Discussion
The question of man's role in the world has been raised by scientists and philosophers, who have argued that man has a special responsibility to the world. This responsibility is often seen as a moral obligation to work towards the betterment of the world.
