Biggs Is First In Recital Series

E. Power Biggs

MIT will offer another concert series this year as part of its musical program celebrating the Institute's Centennial.

This year's first concert of the three-part series will be given by E. Power Biggs on November 30.

Marie-Claire Aflalo, the youthful French organist, will give the second concert on March 1, while the last concert will present Lady Susi Jeans, widow of the late English physical Sir James Jeans, on April 12.

Series tickets for the three concerts are available for $4. Single tickets will be $2 and may be obtained from Kresge Auditorium, Room 61-026 either by phone or mail.

Class Of '62 Incurs Loss

Tom Geers, a senior from Sigma Alpha Epsilon, will head a new newsmen Sub-committee concerned with undergraduate ethics at Tech. A motion certifying this action was approved at the Undergraduate Committee's most recent meeting, Thursday, November 19.

The new group's purpose will be twofold-to discover if there is any laxity in ethics on the scholastic and professional levels, and to examine the benefits to be derived by strengthening our present code. If the committee finds a significant amount of dishonesty on the undergraduate level, it will also be called upon to suggest means of stiffening the rules now in force. The task will be a student-faculty effort, three members representing each group.

Ethics Comm. Formed

Bob Nagro, chairman of the now-defunct Honors Committee gave a resume of his body's findings. His recommendations were:

(a) to disband the committee since it had performed its function;
(b) to discuss and decide what action, if any, should be taken on his findings; and (c) to form a new committee if further action is necessary. All these recommendations were accepted by the governing body, and the Subcommittee on Undergraduate Ethics was established.

Pete Gray announced that a student was needed to plan and carry out a convocation for Centennial Week. The date is April 10, 1961, and the site is Kresge Auditorium. Anyone interested is urged to contact Ira Jaffe in Litchfield Lounge immediately.

Max Snodderly announced that the Sunshine Coop and the Phillips Erros fraternity would be required to pay $1,600,000 for a project that 1,818 people participated in. As a result, the Class of '62 will suffer a financial loss.

“IT'S HERE-IF YOU WANT TO WORK FOR IT”

Even before Ron Spetrino received his engineering degree from Case he had good job offers from six companies.

He joined The Ohio Bell Telephone Company—his reason: "I was convinced an engineer could go further here—if he was willing to work for it."

As soon as Ron got his feet on the ground in telephone engineering, he was tapped for a tough assignment. The job—to engineer switching equipment modifications needed to prepare Cleveland for nationwide customer dialing of long distance calls.

Ron wrapped it up in five months, and found he had earned a shot at another tough assignment. In this job Ron helped engineer a completely new long distance switching center for Cleveland. This switching center connected Cleveland with the nationwide customer dialing network. It was about a year later that Ron put the finishing touches on the spectacles for this $1,600,000 project.

Today, as a Supervising Engineer, Ron heads a staff of five engineers and is responsible for telephone switching in much of the greater Cleveland area.

He supervises the design and purchase of $3 million worth of equipment a year. And even more important, he is charged with developing the technical and managerial skills of his staff.

Ron knows what he's talking about when he says, "In this business you have to do more than a good job. We expect a man to be a self-developer. We expect him to take responsibility from his first day on the job and think for himself. You don't get ahead around here by just doing time."

If you want a job in which you're given every chance to prove yourself, and real responsibility right from the start—you'll want to see your Placement Office for further information.
