Robson Finishes Third

The MIT varsity cross-country team was driven by the University of New Hampshire on Saturday at the Franklin Park course, 30-41. The winner of the race in an exciting time of 20:43 was Dave Langlois of UNH.

Mike Robson then on well for the MIT harriers, finishing the race with a personal best of 21.04. He was running a strong second until several were caught in the last half mile and, as a result, lost one place to the second man of the UNH harriers.

Tom Goldsmith of MIT finished fifth, also with his best time of the year, 21.34. This race was won when UNH put four runners in ahead of MIT's next four runners—Roger Hinchliffe, Capt. Steve Bender, Chuck Gaywitz, and John Decker—who were running together most of the race.

Also running for MIT Saturday were Larry Feinser, Carl Dubi, and Steve Olivo. The meet took place at the Coast Guard Academy, New London, Conn., on Saturday, Oct. 16.

The first 10 finishers in the UNH-MIT race were: 1, Long; 2. Robson; 3, Robson, MIT; 4, Wolfe, UNH; 5, Goldsmith, MIT; 6, Petori, MIT; 7, Fred; 8, Wanneman, UNH; 21:40; 9, Allie, UNH; 21:48; 10, Learned, UNH, 21:59.

... Frosh Also Lose

The MIT freshman cross-country squad also lost to a much stronger University of New Hampshire team, 45-15. Running again without the services of John Golken, who although he was out of the Army will not be able to run so far, the squad was not at full strength.

Today, Frosh played feebly, but it Golden and Oliver, another man plagued with injuries, can get back into top shape for the Easterns and the New England races. The Frosh finishers today might do something in these two big meets. A good man was run by Roger Boston, although he was out-sprinted in the finish.

Your Future in Electronics at Hughes

As the West's leader in advanced electronics, Hughes is engaged in some of the most dramatic and critical projects ever envisioned. Challenges for your imagination and development are to be found in such diversified programs as:

- Project Surveyor (soft lunar landing)
- 3-dimensional Radars
- Planetary Flight Propulsion
- Solid State Materials and Devices

These are among the more than 500 outstanding programs now in progress at Hughes. These programs require the talents of E.E.'s and Physicists who desire to work with professional scientists in research, development and manufacture.

In addition, Hughes sponsors advanced degree programs for academic growth. These programs provide for advanced degree study at many leading universities.
