Father William Sullivan, C.S.P.  
Room 2-108, 5:00 p.m.

We believe that, to a greater extent than any other company, Procter & Gamble provides opportunity for advancement on the basis of merit alone.

Procter & Gamble has a consistent record of:

- Rapid growth and product diversification that continuously provides new technical management career opportunities year after year.
- Employment of engineers directly from the campus to fill the needs generated by our expanding business.
- Providing early responsibility during a training period suited to the man's own needs.
- Promotion strictly from within on the basis of performance alone.

For summary information and detailed description of work areas, see our "Careers In Technical Management" literature in Placement Library.
