Your Future in Electronics at Hughes

As the West's leader in advanced electronics, Hughes is engaged in some of the most dramatic and critical projects ever envisioned. Challenges for your imagination and development are to be found in such diversified programs as:

- **Project Surveyor** (soft lunar landing)
- **3-dimensional Radars**
- **Plasma Physics, Ion Propulsion**
- **Solid State Materials and Devices**

These are among the more than 500 outstanding programs now in progress at Hughes. These programs require the talents of E.E.s and Physicists who desire to work with professional scientists in research, development and manufacture.

In addition, Hughes sponsors advanced degree programs for academic growth. These programs provide for advanced degree study at many leading universities.

**View From The Bridge** To Kenmore

By Tom Maugh '63

Tonight's night at 8:15 at the University Theatre, Carl Sandburg is scheduled to discuss "Lincoln's Prairie Years." The famed Lincoln historian will walk the prairie soil that nurtured the Civil War President and will recreate in song and story the frontier that helped make Lincoln great. It should be very worthwhile.

"A View From the Bridge," Arthur Miller's play about a New York longshoreman, will open in a film version at the Kenmore Theatre today. This adaptation of the award-winning play features two relative unknowns, Morris Carnovsky and Red Valone.

Other new shows arriving in town include "Judgment at Nuremberg," "Sergeants 3," and "The George Raft Story," which details the actor's many month romantic involvements.

In conjunction with their exhibit, "The Civil War: The Artist's Record," the Museum of Fine Arts is currently showing four films: "The Red Badge of Courage," and "Lincoln Speaks at Gettysburg." Although the exhibit ends fifty years after the films, which are shown at 2:30 every day except Sunday, are free to the public.

While you're there, examine the Museum if you've never been through it before. You'll find it's really a fascinating place.

"The Fantasticks," currently showing at the Charles Playhouse, has been extended until February 19. Starring Barbara Quincy, Will Mackenzie, Richard Beatty, David Vaughn, and Stanley Hay, the play is the first musical-comedy that the Charles Playhouse ever attempted.

The original production of musketry is currently in its 21st month at the Sullivan Street Playhouse in New York, making off-Broadway's second longest running show. Take my advice and don't miss it. It's fantastic! (Pardon me.)

Detective "Lincoln's Prairie Years." The exhibit includes selections from the Library's collection of original documents, this should make a very worthwhile trip. Tickets are $2 and may be obtained at the Kresge Box Office.

The exhibits also include a selection of arts and crafts work by members of the Cambridge Center for Adult Education; a showing of books selected by the publishers for their excellence in design, binding, and typography; modern color reproductions of old manuscripts; drawings and lithographs of American people and scenes by George Bellows; and an exhibit of selections from the museum's collection, including many of the choicest rarest, and most beautiful items in the library's collection. **M**

MIT will have a full week at least as far as music is concerned. Friday evening, the MIT Symphony Orchestra, Concert Band, and the Lincoln Memorial Quartet will present a program of music by Henry Purcell. These are three excellent groups, and should present a good evening's entertainment. Tickets to the concert are free if obtained prior to the concert.

Sunday afternoon, the Sulkud String Quartet will present the fourth in their series of concerts. Sponsored by the MIT Department of Humanities, this alreadymakes a very good program. Tickets are $1.00.

For those of you who like to combine science and music, the New Arts Orchestra will present a Concert of Electronics Music tonight. Directed by Milton Babbitt, this should be quite different, in any case. Tickets for the performance, to be held at the Boston Conservatory, are $2.00 and will be priced from $1.00 up.

**Take a Big Step Closer to Your Future**

Mon. & Tues. February 19 & 20

If you are a qualified engineering student who feels your future lies in research or manufacturing, we want you to see the Linde Company representative when he is interviewing on campus.

The Linde Laboratories provide ideal growth experience for the scientist-minded. Significant is the fact that in order to maintain the continued search and applied engineering people have created products and facilities which now account for more than half of the company's total sales volume.

You can grow as a Linde employee; contact your engineering placement office now for an appointment.
