RADP Holds Peace Walk Meeting

The MIT Student Organization for a Rational Approach to Disarmament and Peace will present an open meeting in the Bush Room, 25-105, at 8 p.m. tomorrow evening. Members will speak on the purposes and accomplishments of the Walk in Washington project February 16 and 17.

The speakers are among MIT students who went to Washington to participate in the Walk, and will speak from personal experience on the preparation, policy statements, congressional interviews, picketing, rally, attendance, news coverage, and other facets of the project.

Three concluding speakers will describe a number of actions and research projects now being undertaken by RADP to foster individual, campus, and national interest in a peaceful and responsible Peace Movement. One of them will be Ken Porter, a leading individual, campus, and national interest in a powerful but responsible Peace Movement. One of them will be Ken Porter, a leading individual, campus, and national interest in a powerful but responsible Peace Movement.

The public is invited to hear the speakers and remain for a question-and-answer session afterwards. Free refreshments will be served during the meeting.

Existence Justified

Frosh President Reports

Arthur A. Rushkin

The first official undertaking of the Froshmen Council of the Class of 1965 was the host committee's early preparations for Field Day. This year's committees were appointed to be in charge of the preparations for each single event. Pre-lightning organization proved to be the deciding factor, the appearance of the Glove Fight was quickly broken, and the Froshman Council officially earned its recognition on the MIT campus.

The next question before the Council was what to do about the not-so-popular Froshmen Quiz Book. After lengthy consideration, the Council decided that, in view of the previous experiences of other classes, an alternate froshmen social function during the second term would be more suitable. At present, a committee is investigating the feasibility of a class picnic followed by a moonlight cruise on a large ferryboat.

Following a discussion in the Froshmen Council, the President and the Vice-President of the Class, and one delegate from each of the Council, met with representatives from the Walker Student Staff to discuss the Quiz Book. Due to a misunderstanding concerning the letter sent to all incoming freshmen, Walker Staff agreed to distribute, free-of-charge, a second-term Quiz Book to all freshmen who ordered the first term book through the mail. This promise was duly kept, and the second-term Quiz Book was well received by the class. The clarity and completeness of the solutions, as well as an overall makeup of the entire book, did credit to all who were a part of its publication.

An extremely useful survey of the entire class was conducted by the Froshmen Council, in cooperation with the Freshman Coordinating Committee, shortly before the Christmas vacation. The results, which will be released in a few weeks, will serve to enable various departments of the Institute to re-evaluate, and possibly readjust, their freshman policy.

This year the Froshmen Council, after adopting a new design, engaged a new company for the production of Class Pins. The result was a substantial lowering of the price, yet a finer and more delicately engraved design. The class support of these pins quickly surpassed expectations, and a profit of over $200 will be put in the class treasury.

The President of the Class has attended informal monthly meetings with President Stratton and Dean Holden for the purpose of a communication of ideas between the Administration and the Froshmen Class. The Institute is strongly aware of the problems facing the new student at Tech, and these meetings have enabled the President to realize this.

One of the by-products of these meetings was the establishment of informal gatherings consisting of six to ten freshmen and different members of various school administrative offices. These gatherings have served a twofold purpose: first, to enable freshmen to become personally acquainted with different school officials and to be able to casually discuss Institute policy with them; and second, to furnish valuable feedback to the various departments involved — for example, the Admissions Office was greatly interested in students' reactions to the literature sent them during the summer. One of the future aims of this project is to extend the program to include members of the faculty. The primary reason for this has already been discussed.

The Freshmen Council of the past term has accomplished many things, within its range, but undoubtedly its greatest accomplishment may be counted as the sum of the accomplishments of its individual members. Each participating freshman was given the opportunity to become a part of the Institute, to realize its facilities, and to take advantage of them. In this respect alone, the existence of a Freshman Council is easily justified the answer.

Pall Mall's natural mildness is so good to your taste!

So smooth, so satisfying, so downright smokeable!

Pipes To Supply Water For Magnet Lab Cooling

Girls' Watchers' Guide

Presented by Pall Mall Famous Cigarettes

LESSON 2 - What about standards?

Advanced students of girl watching never waste eyewax on the least worth-while girls who are not beautiful. Standards must be kept high.

But how do we judge whether a girl is worth watching? Although many strict academicians will shudder at discussing girl standards, we must be kept high.

Every girl is beautiful to someone! For example, many observers have pointed out that the Bare-Backed Beachbomb (see above) has a weak chin. Yet none of their keen-eyed experts would deny that she is indeed an attractive specimen. And, speaking of standards, don't forget to keep your smoking standards high. Smoke Pall Mall!
