'Fellows In Africa' Termed Success

"MIT Fellows in Africa", initi-
sed experimentally two years
ago by the School of Industrial
Management, has proven itself
as an educative and economic ad-
sistance project and will be con-
tinued, Dean Howard W. Johnson
explained. This must have encour-
gaged on participants begin-
ing this fall.

Under the program, young man-
agement and low graduates work
for two years in African sta-
tions in government offices or
ministries of economic planning
or commerce and industry. Their
work includes selecting sources
of aid for developmental projects,
outlining and writing proposals
for the projects themselves, draft-
ing legislation, or revising legal
codes.

MIT Fellows in Africa" allows
members to apply their profes-
sional knowledge as individuals
or as a whole. Under
the program, young men have been
selected as associates of MIT stu-
dents and have worked in a variety
of capacities and fields.
