Exam Requirement Clarified

Engineers-in-training and registered professional engineers must meet certain requirements to have their status officially recognized. The Dean of Engineering’s Office has released to Engineering Department a memo specifying these requirements.

From One Square To Another...

(A paid advertisement of a non-political nature sponsored by the committee for inner social relations.)

What’s happened at the HONEY BEE (700 Mass Ave, Cambridge) that has triggered such a mass migration over the past ten days?

1. Is it true that the manager is on the verge of another nervous breakdown and is threatening a common medius will against the owners? Why has the Law School rallied to the owner’s defense?

2. Why has the cook objected to the suggestion made by the Reddit committee that he make his food look available to the city fox as a fall-out shelter? Are the owners about his sub-conscious feelings really true, or is it just another hate that put out by jealous competition?

Will the motion to provide study halls facilities for shop students on Monday and Tuesday evenings be defeated? Will the bar and breakfast room be held from 9:00 P.M. to 1:00 A.M. on Wednesday and Thursday evenings continue to receive favorable committee support, or will the motion in favor of providing 85 scanty chad choo’s prevail?

The Ball will also feature a Diplomatic Reception for the Consuls of the Boston area. The ISA expects 1000 students of about 70 nationalities to attend. The Ball will be held in the Town Room of the Somerset Hotel from 8:30 to 9:30 p.m. The ISA is a community group which operates for students throughout the world.

"Tareyton's Dual Filter in duas partes divisa est!"

says Titus (The Chisel) Aurelius, Ars 63 B.C. "O tempora! O mores!, I used to wail," says The Chisel, "where today can you get a filter cigarette with some flavor? Then I discovered Tareyton—the magnum opus in cigarettes. Put a pack in your toga and enjoy de gustibus you never thought you’d get from any filter cigarette.

Tareyton

"Hungry for flavor? Tareyton's got it!"

DUAL FILTER

The memo states:

1. The status of engineer-in-training is not a necessary step in becoming a registered professional engineer.
2. No examination is required to become a registered professional engineer.
3. To become a professional engineer, one must merely graduate from a four-year engineering college or give evidence of four years’ experience in an engineering field following graduation. All graduate study must count no more than one year of experience.
4. The value of becoming a registered engineer-in-training is in a question to be decided by the individual student.
5. This means that seniors at MIT may apply to the Board of Registration of Professional Engineers and of Land Surveyors of the Commonwealth of Massachusetts upon graduation to receive accreditation as an engineer-in-training. The applicant must also submit an irrevocable $10 fee.

The Board of Engineers in Training, Room 34, State House, Boston 35, may be contacted by mail or in person. The Board will then inform the candidate of the next written examination. This examination must be successfully completed to receive the engineer-in-training certificate. It is not necessary to become an engineer-in-training to later become a professional engineer. What is required is an SB degree in engineering plus an additional four years of satisfactory field work.
