**Voo Doo Visited: Beer Vanishes**

*By John L. Schwartz*

The drop in the class average on 18.01 quizzes this year has re-echoed the drop in attendance of new women to the course, according to Prof. Arthur P. Mattuck, who has taken charge of the course.

While last year's average scores on hour exams was about 70%, the average for the first two weeks of this year was only 56%.

**Supplementary Problems Given**

Along with regular problem sets, the instructor, Profs. Mattuck and Bowman, have given supplementary problem sheets posing difficult questions on differentiation, integration, function theory and other topics.

Explaining the reason for the additional problems, Mattuck said that the supplementary material will be continued in the presentation of 18.02 next term. Moreover, next year's freshmen will also have supplementary problem sheets to contend with. However, Mattuck said that he hopes to make the transition a little easier for next year's freshmen as a result of his experience with the class of '66.

**Inconsim Hears Committee Statements**

By Joseph Sullivan

A new policy governing the use of bulletin boards and booths has been endorsed by the committee.

In an ad hoc decision, the In- stitute Committee unanimously ac- cepted the proposal, which was presented by a student member of the class of 1966.

The statement has been op- posed by the Student Secretaries in- council on the grounds that the Acti- tivity Council does not have jurisdiction over the facilities.

The dispute will be more fully discussed at the next Inconsim meeting.

In other business, IAP Woodrow Bowman reported that Open House would definitely be held this year, and that arrangements for the event were being made.

There will be no curfew for upperclassmen.

The number of coeds will greatly exceed last year's. Robert Penn Warren reported that the growth will continue, as the new dorm will hold 116 girls. Next year it will have about 98.
