THE SAFE WAY to stay alert without harmful stimulants

NoDoz keeps you mentally alert with the same safe refresher found in coffee and tea. Yet NoDoz is faster, handier, more reliable. Absolutely not habit-forming.

Next time monotony makes you feel drowsy while driving, working or studying, do as millions do ... perk up with safe, effective NoDoz tablets.

Another fine product of Great Lakes Chemical.

**Wrestlers Smash UConn, 31-2**

MIT's Varsity Wrestling Team extended its season record to 2-1 with Saturday's victory over the University of Connecticut 31-2. The lone defeat came at the hands of Harvard a week ago Tuesday.

Arwen Gabrielian, '63, 125-pounder, pinned Junr. in 2 min. and nine seconds of the third period. Alan Rogol, '63, ran out of time and could only come up with a tie against Danbury.

James Evans '63, still undefeated this season, pinned Slag in one minute and thirty seven seconds, the fastest pin of the match. Terry Charnin '63, also undefeated this season, pinned Lagnas in 2 min. and thirty two seconds of the third period.

Bob Thomas, '65, wrestling in the 157 pound class, pinned Arenas in one minute and thirty eight seconds of the third period.

Terry Gerity '63, recording one weight division above his regular position, crushed Dietrich '43, almost pinning him several times.

*The story begins in 1957 when Ford engineers conceived, "Let's do a feasibility study on tracklaying military vehicles."*

Command said in effect to Ford Motor Company engineers.

"Another example of engineering leadership at Ford and new ideas for the American Road."

**Action: Now under Army test, a Ford-designed glass filament torsion bar that's lighter, stronger, more flexible than steel**

"Looks like you've got something there," the Army Tank Command said in effect to Ford Motor Company engineers.

"Let's do a feasibility study on tracklaying military vehicles."

The story begins in 1957 when Ford engineers conceived the idea of a plastic-bonded glass filament torsion bar for vehicle suspension systems. It was a revolutionary departure from the use of solid steel. It promised dramatic weight savings in battle tanks, in personnel carriers and other military vehicles. For example, as much as 1,000 pounds in medium tanks.

Compared to steel, the tubular-shaped glass filament composition has greater energy storage potential — stronger and more flexible under heavy load. It may well prove to be the automobile suspension material of tomorrow . . . cars suspended on glass!

**5 IM Ice Squads Maintain Win Streaks; Lead League Races**

Theta Chi, NURS, Phi Mu Delta, Chi Psi, and Sigma Chi maintained unblemished records this week to hold first places in their respective IM hockey leagues.

Theta Chi, led by the scoring of Dean Smith '64 and Bill Jessiman '63, swept past Sigma Phi Epsilon 7-0 and Senior House 4-2. Smith had five goals and an assist, to put him second in the A league scoring race behind Norm Dorf '63 of Phi Gamma Delta.

To an exciting contest for the lead in the B league, NURS downed Lambda Chi Alpha 5-3 in sudden-death overtime. Steve Croppa '65 tied the score for NURS with 14 minutes left in regulation time. With 38 seconds left in the overtime period, Allen Clark '65 put the puck by Lambda Chi goalie Pete Iovino for the win.

Phi Mu Delta took the lead in the C league by edging Sigma Alpha Epsilon 3-1 on goals by O'Connell and Sternberg. Chi Psi took a commanding lead in the D league by defeating Alpha Tau Omega 5-0. Warner Bliss '65, four goals and two assists; Halli Hill '63, five goals and one assist; and Jan Treilman, three goals and one assist led the way to the highest scoring game this year. Bliss now has seven goals, four assists, for eleven points, tops in I.M. Hockey.
