Fed up with a profusion of promises?

If the thought has crossed your mind that there's too much of a good thing going around for engineering students lately, we don't blame you. We're making no exaggerated promises. In fact, we are looking to you and other engineering students for promise to bring to us.

History's second most significant Noah defies promise us, "Round for hope, expecta-
tion, or assurance, often specific, of eventual success." Since we are dedicated to the propo-
sition of complete success in all our endeavors, and the less "eventual," the better—we are looking for men of promise.

What's up at Hamilton Standard? In brief, a diversification program that includes design and development of propulsion controls, life support systems, other environmental control systems, electron beam, automatic stabilization systems, propellers, and ground support equipment.

A Hamilton Standard college personnel representative will be on campus soon. He'll be glad to answer your questions, and to take your application for a position if you decide you like what you've learned about us.
