Movie Schedule

(Continued from Page 1) bowing alley, a snack bar, barber shop, dry-cleaning and tailor shop, bank and a post office will be located along a "main street" of shops which may eventually be extended along a passage under Massachusetts Avenue to provide an all-weather link between the west and east campus. The underpass would eliminate a busy pedestrian crossing.

The upper floor, cantilevered above the social and commercial areas, will have 60,000 square feet of office space for a large number of student organizations, additional lounges, art rooms, dark rooms, facilities for music, painting, and a publication center.

Basic Objectives

A committee of students, faculty, and administration members, headed by Robert J. Holden, associate dean of student affairs, and administration members, has been formed to study the Center's potential and to incorporate the Center's objectives into the University's overall planning. Members of the committee include: Robert J. Holden, Boston, J. R. Taylor, Sargent, Edward S. Boland, Healy, John C. O'Connor, Somerville, Joseph A. Finnegan, Law, and Robert F. McLaughlin, Law.

The experiment takes about two weeks, and the results of the experiment will be reported in the student newspaper.

Attention 1963 Candidates for Bachelors & Masters Degrees in Electronics

Wednesday, March 6... RADIATION INCORPORATED will have a representative on campus to interview candidates who are interested in a challenging opportunity in the Electronic Research and Development Field. RADIATION INCORPORATED has a reputation as a leader in the field of electronics, with a staff of highly skilled and experienced engineers.

Continuing contributions by Radiation to such advanced research and development programs combined with the climate and conditions of sunny Florida provide ideal surroundings in which to gain that experience necessary for today's electronics engineers.

For interview appointments and further information contact your Student Placement Office, or send resume to:

R. R. Rhodes
Radiation Incorporated
Melbourne, Florida
