Harvard dean final conference speaker: delegates from 32 colleges attend

Friday at 1:30 pm; and the summary address Saturday at 2:30 pm. The five previously announced plenary sessions will be followed by the first three plenary sessions, plus panels in the second session, Alpha B. Lerner, of Michigan State University, will present "The Role of the Governor of Massachusetts in the University," with Paul M. C. Cracks, of the University of Chicago, and the governor of Massachusetts, together in charge of research at Bell Telephone Laboratories, will address the question of the role of the governor in scientific and political decision-making. George P. Schultz, Dean of the Graduate School at the University of Chicago, and Saul Lederer, of the Atomic Energy Commission, will speak on the problem of labor-management relations.

Following each of the public lectures, there will be panel discussions with MIT professors, and then there will be open discussion, among students, parents, and visitors, in addition to previously announced panelists. Professor Hood D. Pool, MIT Professor of Computer Science, will participate in the discussion of economics and government.

The MIT conference will be held in MIT's facilities, and fees will be organized to cover the costs of attending conference proceedings, and to be distributed to students. The conference will be open to the public, and at 8:30 pm on each evening of the conference, the program is to develop reading efficiency, not speed.

Harvard University press has announced the publication of an article by Harvard University press, with the title "The Rise of Historical Criticism." The program is free and open to the public.

Professor B. R. Hay, a scholar of ancient Greek and Latin literature, will present his findings on the ancient literature in the Great Hall of the MIT Open House Committee.

Historian Butlerfield to talk tonight

Herbert Butterfield, professor of modern history at Cambridge University, England, will deliver the Harris M. Memorial Lecture at 8:15 pm on April 1 in Kresge Auditorium. His subject will be "The Rise of Historical Criticism." The program is free and open to the public.

Professor Butterfield is a scholar of ancient literature, and will present his findings on the ancient literature in the Great Hall of the MIT Open House Committee.

The Tech

Stommel, von Arx named professors

Dr. William S. von Arx, director of the Center for Earth Sciences, was appointed professor of oceanography in the Department of Geology and Geophysics. His principal interests in the area are the physical geography and ocean currents, and navigation and inertial reference at sea. Professor Stommel became a part-time professor of oceanography at MIT in 1956, became a research professor at Woods Hole in 1944, and two years ago was appointed professor of oceanography at Harvard. In his research he has been particularly conscious of the fluid dynamics of the ocean, and of the influence on the atmosphere. He has made important contributions to the theory of ocean circulations and the studies of various submarine temperatures and humidity over the sea, and while Professor Stommel remains primarily in the relationship between ocean and land, while Professor Stommel concerns himself primarily with the relationship of the ocean to the air, according to Dr. George H. Krueger, of the Harris M. Memorial Lecture. "Their collaborative approach to the problems of oceanography, both in the Green Center for Earth Sciences."
