Married students' dorm to open in fall

By Alan Bildies

A baby clinic for pre-natal and post-natal care for babies and pregnant mothers will be one part of the new campus's student housing, opening this September. Five new buildings on the west end of the campus will provide housing for 218 married-student families. The buildings include a 3-story tower with 91 one-room efficiency apartments and 60 one-bedroom units. Four three-story buildings contain a total of 46 two-bedroom apartments. All are unfurnished.

The ground floor of the 6-story tower has a lobby, superintendents' office, baby care storage area, and a variety store.

There are two bathrooms. This first has one-operated hunny machines and the lower one contains storage cubicles. The building is served by two high-speed elevators.

The rooms have large picture windows. Each apartment has baseboard radiation heating, tile baths with showers, and a kitchen complete with an electric refrigerator, ventilator and cabinets.

The development has landscaped grounds with a play area, trees, and benches. Individual balconies can be installed in the high-rise building.

Applications for the residence must be made to the Office of the Dean of Residence, Room 1 T-191. Applicants have until May 31 of the current year to apply.

The two bedroom apartments in the low-rise building, primarily for couples with or without children, are $173 per month. The efficiency and one-bedroom apartments range from $96 to $130.

Lecture series

On food science

To begin in fall

An Underwood-Prescott Memorial Lectureship has been established at MIT.

Annual lectures will be presented at MIT beginning next fall, according to Dr. Julius A. Stratton, Chairman of the MIT Corporation and President of the National Academy of Sciences. The series will be inaugurated with a lecture by Dr. Samuel A. Goldblith, of the Department of Agriculture and the Institute of Food Technologists. The series will include five lectures given by outstanding authorities in the various fields of food science. Admission will be free and will also be open to all the students and faculty of the MIT Corporation.

The first of the series will be given by Dr. Samuel A. Goldblith, of the Department of Agriculture and the Institute of Food Technologists. The lecture, to be held at 8 p.m. on April 11, will be entitled "Food and the Fall of Man." The second lecture will be given by Dr. F. H. C. Northrop, of the University of Pennsylvania, on "Food and the Fall of Women." The third lecture will be given by Dr. F. H. C. Northrop, of the University of Pennsylvania, on "Food and the Fall of Children." The fourth lecture will be given by Dr. F. H. C. Northrop, of the University of Pennsylvania, on "Food and the Fall of Men." The fifth lecture will be given by Dr. F. H. C. Northrop, of the University of Pennsylvania, on "Food and the Fall of Women." The series will conclude with a lecture by Dr. F. H. C. Northrop, of the University of Pennsylvania, on "Food and the Fall of Children.”
