'Candida' opens tonight at Charles

George Bernard Shaw's classic comedy "Candida" will open tonight at the Charles Playhouse.

Cast in the title role is Gaye谴c Doylehoulie, a member of New York's Phoenix Theatre Acting Company. Leon Shaw, who has appeared in previous local Phoenix productions, will be seen as the Reverend James Mavor Morell. Tucker Averesh, a founder member of the Association of Producing Artists, plays the role of Mrs. Morell.

Other cast in the production: Robert Duster, as the Reverend Alexander Mill; Robert van Horsten, as Mr. Burgess; and Denise Nurse, as Priscilla Gamett. The play is under the direction of Michael Murray.

"Candida" is the sixth production of the season.

Assignment: build the "grease gun" into our cars

We went to the mountain to make 1963 Ford-built cars go 30,000 to 100,000 miles between major chassis lubrications.

Quite a task faced Ford Motor Company engineers when they set out to eliminate the traditional trip to the grease rack every 1,000 miles.

Like Mohammed, they went to the mountain—Bartlett Mountain on the Continental Divide in Colorado. Molybdenum is mined there than in the rest of the world combined. And from molybdenum ore comes the amazing "moly" grease that helps extend the chassis lubrication intervals for Ford-built cars. This grease sticks tenaciously to metal, stands up under extreme pressures and resists moisture, pounding and squeezing. It is slicker than skates on ice!

New, improved seals were developed. Bushings, bearings and washers of many materials were investigated. Slippery synthetics, like nylon and teflon, were used a number of new ways.

The search for means to extend chassis lubrication also led to New Orleans—where experimental suspension ball joints tested in taxis in regular service went two years without relubrication.

It took time. And ingenuity. But the effort paid off when Ford-built cars were the first to build in chassis lubrication good for 30,000 miles or two years—whichever came first.

Another assignment completed—another "Ford First" and another example of how Ford Motor Company provides engineering leadership for the American Road.

MIT Music Library Series present woodwind quintet

The Musical Arts Woodwind Quintet of Ball State Teachers College, Muncie, Indiana, will present a concert in the Music Library Series Tuesday, April 9, at 12:45 p.m. The concert is free.

The program will include:

1. "Rondo," by Bernard Heiden, 4:30
2. "Juno," by Robert Sherman, 5:00

"Rondo" was written as a study for string orchestra.
