26 teams open IM rifle competition

Intramural rifle competition got underway with a meet Saturday, April 13. 26 teams participated.

The meet was won by Sigma Phi Epsilon A with 989 points, followed by Alpha Epsilon Pi, 757; and Grad House, 729. Each of the four men on a team fired 20 shots from a prone position. High possible team score was 800. "It was a beautiful day, with a blue sky and high clouds. The sea at times was rather heavy and it took us much longer than we calculated," said one of the students. "It was a beautiful day, with a blue sky and high clouds. The sea at times was rather heavy and it took us much longer than we calculated." The two had made their journey in answer to challenges by students at Manchester and the Sheffield Universities.

South American participants will work in South America next year, with MIT students and professors. This year the MIT students will work with Brazilian students in civil engineering; there will also be two students now in industrial management.

The Daytonas 500 is one of America's toughest stock car events. It measures the toughness, stability, over-all performance and economy characteristics of the cars that take up its challenge — in a way that compresses years of driving punishment into 500 blazing miles. This year mechanical failures claimed over 100 per cent of the cars that entered. That's why Tiny Land's victory in a Ford (with four other Fords right behind him) is a remarkable testimony to sheer engineering excellence.

Ford attributed his victory in part to "the missing pit stop." He made only one pit stop for fuel than his competition — proving that Ford economy can pay off. He made the long trip across the English Channel. It was kept as tight as two 40-gallon oil drums. Two Liverpools of the MIT students set a new record in the 500-mile race from Dover, England on their sailboat. Many hours later they reached Calais, France.

Get your Thunderbird safe and sure... from the best! A more conventional form of transportation— the automobile—might often cause more difficulties than would the Thunderbird. You can pay for it. Sorry. It's too late. Gary returned from a movie late on the evening of April 12 to find his car the possessor of a large dent. He also found, on the windshield, the following note: "I am writing this note to make people think. I am giving you the solutions, but you look like you can pay for it. Sorry." The damage came to more than $300.

A New Pressure on Students

It will certainly cost more than $500 to get accurate results in the election of officers of each of the Ohio State Alumni Association. The Ohio State Eastern chapter of the fraternity, a certificated public accountant, and IBM card are being used in a newly instituted procedure to insure accurate results.

College World

Liverpool students cross Channel on five-horsepower-driven bed

Among the bigger fads to sweep through the nation's colleges last year was that of bed-posting. One or two students would board a bed and be pulled across campus across hill and dale. This idea, with a few modifications, has just caught on in Great Britain. The most significant changes are that students are no longer pushing and that the bed is no longer crossing hill and dale. Outfitted with a five-horsepower outboard motor, the bed made the long trip across the English Channel. It was kept afloat by two 40-gallon oil drums.

Two Liverpools of the MIT students set a new record in the 500-mile race from Dover, England on their sailboat. Many hours later they reached Calais, France.

Economy then, is many things to man: economy is the measure of service and economy is the measure of service and economy then, is many things to man: economy is the measure of service and economy is the measure of service...
