A mid-year MIT student took part in Tuesday's bomb raid on Cuban oil refineries. When asked if he had any regrets, the student said he was complimented by the size of the operation. 'We had a pretty good hit', he said. 'We were in the right place at the right time.' When asked if there were any casualties, the student replied, 'No, we were all on the ground.' The student's role in the mission was to provide cover for the crew during the operation.

**Technical advisor in preparing bomb**

**Tech student participates in air attack on oil refineries in Cuba**

A mid-year MIT student took part in Tuesday's bomb raid on Cuban oil refineries, according to The Tech, the student, who declined to be named, said he had been involved in the operation since the beginning. "I was on the ground when we dropped the bombs," he said. "I was in the right place at the right time.

The student, who did not wish to be identified, said he had been working on the project for several months. "We have been planning this for a long time," he said. "We have had a lot of practice.

"We dropped bombs on the refineries, and we were able to hit all of them," he added. "The bombs were very effective. We were able to destroy a lot of the oil.

"The operation was very successful," he said. "We were able to get the oil out of the refineries and into our tanks.

"We are very proud of our work," he said. "We have been working very hard to make this operation a success.
