Several important events remain as freshman Weekend draws to a close. Today's schedule includes a group of lectures entitled "Introduction to Technology," at Kresge Auditorium, followed by the Activities Midway.

President Julius A. Stratton and Dr. Warren K. Lewis, professor of psychology, and Dr. Harold Edgerton, professor of electrical engineering, will also address the group.

The Activities Midway will follow that evening in Rockwell Cage at 7:45. Freshmen will have an opportunity then to familiarize themselves with the numerous and diversified extra-curricular activities available to the MIT community.

Freshman Week End will conclude with a reception given by President and Mrs. Stratton for freshmen and their parents from 10:00 to 5:30 pm at the President's House, 311 Memorial Drive.

First to be completed were the three five-story buildings in the Westgate complex. Opened on August 19, the 60 apartments in these buildings are now fully occupied. All two-bedroom suites, they rent for $120, $125, or $130. In both cases, the lowest price is for the better five floors, the next highest for the middle five, and the top two for the bottom five.

All apartments are unfurnished except for refrigerator, stove, and sink. On the first floor, parking lot should accommodate about 100 of the residents' cars. Louuses are for a full year.

The new women's dormitory, McKim Hall, is open, for use as of this month, and 96 of the 138 vacancies have been filled. In both cases, the lowest price is for the better five floors, the next highest for the middle five, and the top two for the bottom five.

Except for minor touch-ups, the building is completely finished; the rooms still lack desks and book cases. McKim Hall's facilties will be handled and cared for by the women's residence hall, a graduate student residence hall, and a graduate student residence hall.

Two prominent members of the Institute community died unexpectedly during July.

Hudgins of the School of Industrial Management died following a period of illness. Mr. Kimball joined the Institute in 1933, became Assistant Secretary of the Institute, he became Professor, administration official and President of the Alumnus. He served as the Executive Assistant Director of the Los Alamos, New Mexico, Laboratory of the AEC. During his past three years as Director, he played a vital role in bringing the Second Century Fund program to successful completion.

Completion of housing facilities during the war, he assisted the government. The exact effect of this move is not predictable, but it seems certain to force a reduction in the tobacco industry's advertising revenue, voluntarily and summarily cancelled advertising. The exact effect of this move is not predictable, but it seems certain to force a reduction in the tobacco industry's advertising revenue, voluntarily and summarily cancelled advertising.
