Supreme Court Justice to speak

Arthur J. Goldberg, Associate Justice of the United States Su-
preme Court and former United States Secretary of Labor, will

discuss the techniques of bargaining

for workers at the Sanders
Theater, tonight, at 8:00.

This will be the second annual
Dahm-Narandaikul Memorial Lecture sponsored jointly by Rad-
craft and the Harvard-Radcliffe
World Federation.

In his talk, "World Peace
Through World Law," Goldberg will
calculate the methods he
has used in setting labor dis-
putes with those which could be
used by negotiators in setting
international disputes. He will
draw upon his experience as a
Supreme Court Justice, as well
as his participation in the im-
or agreement of the AIL and

The 217-foot structure, located in
Cambridge, will contain class-
rooms, instructional and research
laboratories, seminar rooms, and
offices.

The first story of the tower will be
a 300-seat auditorium for gen-
eral use by the institute. The sec-
ond story Longview Library will
contain 32,000 to 35,000 books and
journals on the earth sciences and
closely related fields. Classrooms
and seminar rooms for general
Institute use will be on the third
floor.

All facilities from the fourth to
the seventeenth story will be occu-
pied by the Department of Geol-
ogy and Geophysics. Headquarters
for Course XII, including of-
cine, a faculty lounge, and lecture
halls, will be on the ninth floor.

The tenth and thirteenth stor-
es will house classrooms, offices
and laboratories for society
geography.

The Department of Meteorology
will use the facilities for the four-
teenth story, with a roof, with
Course XIX headquarters on the
assistance story.

On each of the stories from
the third to the ninth, offices
and small conference rooms will
overlook the Charles River, with
the classrooms, instructional and
research labs, and machine
and electronic shops on the north
side. Access to these floors will be

AN OPPORTUNITY TO GROW
IN THE HIGHEST PROFESSIONAL
WORKING ENVIRONMENT

ELECTRICAL ENGINEERS
PHYSICISTS
MATHEMATICIANS

Technical representatives of the MITRE Corporation will be conducting interviews on-campus.

November 8, 1963

The MITRE Corporation designs and develops systems that enable our mili-
tary commanders to detect attack and retaliate instantly.

Typical systems include Nuclear Detonation Detection and

Support System, North American Air Defense

Operations Center, and Back-Up Interceptor Center.

MITRE is also experimenting with techniques for future air
traffic control systems.

The young systems engineer there is no more rewarding
work. You associate with the top men in your field. You
work in an atmosphere that allows you to extend your
abilities professionally and academically.

At MITRE, men trained in single disciplines are encour-
eged to grow beyond their original fields of interest. Systems
designers learn to work from an increasingly broad base.

You may work in such diverse areas as information
theory, computer design, display techniques, propulsion, or
human engineering. You may analyze. You may syn-
these. You may deal with systems or individual com-
ponents. At the highest levels, you may have to consider
political, economic and social factors . . . as well as the
available and predictable technology.

Requirements, B.S., M.S., or Ph.D. in these disciplines
-detection, physics, and mathematics. MITRE is located in

If an interview will be inconvenient, inquiries may be directed in confidence
to Vice President—Technical Operations, The MITRE
Corporation, Box 208, Dept.CNP, Bedford, Mass.

ARRANGE FOR AN INTERVIEW THROUGH THE PLACEMENT OFFICE.

The MITRE CORPORATION

Pioneer in the design and development of command and
control systems, MITRE was charter in 1958 to serve
United States Government. The independent non-
profit firm is technical advisor and system engineer for the
Defense Electronic Systems Division and also serves the
Federal Aviation Agency and the Department of Defense.

The mixing of a flag less
marked the "topping out" of the
Bratray Green Center for Earth
Sciences.

Ceremony marks occasion

Green center construction nears end

Workmen of the Turner Construction Company of Boston
raised a Canadian flag last Friday as the last bucket of con-
crete for the Earth Sciences Center was poured.

You have room for growth in data processing— at IBM

IBM offers graduates with bachelor's or advanced degrees in Engineer-
ning, the Sciences, Business Administration, Economics, or Liberal Arts
challenging assignments in the marketing of information systems and
equipment.

Rewarding opportunities exist in more than 190 IBM Sales and Service
Offices located in major cities throughout the United States.

These opportunities increase with each new system that is designed to
meet the growing needs of business, industry, government, research,
education, or space.

wide range of positions

Marketing: The IBM Data Processing Representative is a consultant to
his customers. He demonstrates how customers can achieve bet-
ter business management and controls through data processing.

Systems Engineering: IBM Data Processing Systems Engineers are
men and women who study customer requirements in depth, devise an
approach, define a preferred machine and operational solution, and
assist in implementing this solution.

opportunities for advancement

IBM, an Equal Opportunity Employer, offers you extensive training in the
area of your special interest. The training continues as you ad-
advance along a planned career path leading to professional or managerial
positions.

We also have comprehensive company-paid benefits plans ... training
programs to keep you abreast of developments in your field ... and a
student-refund plan to give you financial assistance for graduate study.

on-campus interviews

See your college placement director to determine when IBM will inter-
view on campus, and make an appointment to see our representative.

If the interview date is inconvenient for you, please write or call:

John A. Fleming, Branch Manager, IBM Corporation, 19th Street,
New City 14, Colorado, GR 7-2661.

IBM will interview November 14, 15
