Keep Placement Office out of Daggett

By this time next year, MIT will have moved the bulk of its administrative offices from the basement of the historic Daggett Chocolate building on Ames St.

Consolidating many of the behind-the-scenes workers for traffic, this move has been long needed and will be viewed as highly valuable as MIT's growth continues.

The primary reason for the move is to make more space available to the School of Engineering and Science. The Technology Administration Department has already expanded into offices in Building 1

In the new offices, working conditions in the newly acquired building will be better. The offices will be spacious and air-conditioned, and there is an additional space, the subway and other transportation at Kendall.

Current plans call for moving the off-

To the Editor:
Your front page article, and your editorial, expressing concern over the approval of large expenditures for the Office of the Registrar, Student Personnel Office, and Placement Personnel.

Unfortunately, not all of these offices are the behind-the-scenes services that are as well known of the way. The Placement Bureau and Student Personnel Office have one main function. They are to serve students. It is important that they be easy to reach and close to the heart of MIT. Killian has been quoted as saying that MIT must become a better place to work for its students. This includes services such as friendly, helpful, and efficient.

The offices will be connected by the main corridor of the School of Science and the Department of Electrical Engineering and Computer Science. In addition, they are near Kendall Square, which is a hub of transportation, including subway and bus routes.

Wiesner's appointment examined

By Thomas Brydges

While the Institute's appointment of Dr. Wiesner as Dean of the School of Science demonstrates the school's openness to qualified candidates, it is often struck by the fact that the individual is not a scientist. His appointment would seem natural and well-timed to one who understands the potential for improvement.

If he had been traced and pursued his career as a physical scientist, his appointment would seem natural and well-timed to one who understands the potential for improvement. His qualifications as an innovator and administrator, acknowledged by MIT well in advance of his Wash-

University, are the unique qualities necessary for a dean at MIT. His ability to deal effectively with people is an asset that many candidates have been able to demonstrate at the Institute. It is important that the relationship between the student and scientist be maintained.

Despite these qualifications, there are some concerns about the potential for conflict. The appointment of Dr. Wiesner to the position of Secretary of Science is a significant step forward for the Institute.
