MDC rejects bids for repairs of sidewalks on Harvard Bridge; bidding to open again soon

Bids have been taken and rejected for sidewalk repairs on the Harvard Bridge, according to Benjamin Pilk, Chief Engineer for the Metropolitan District Commission.

All the bids, which were considered two weeks ago, were too high, he stated, perhaps because of the weather conditions. Bids will be requested again in the near future, he added.

The work on the bridge will consist of rebuilding of sidewalks and of painting and repainting sections of the bridge.

Portions of the bridge will be closed down for the operation, he stated.

You are high over the Potomac River just 12 miles from the White House... and viewing 186 acres of extraordinary research activity

Of course, from this height you can't see much detail, which makes the imposing expanse of the two main buildings all the more intriguing. Perhaps you can guess their functions, but it's also what you can't see (and this is summarized in the adjoining column) that makes the David Taylor Model Basin a completely unique fundamental and applied research organization — and a place you should seriously consider for your career as a professional scientist or engineer. As the Navy's advanced facility for research into submarine, surface ship, aircraft and missile design concepts, the Model Basin can offer the young graduate certain specific opportunities hard to find anywhere else.

1. Reach the $10,000 to $12,000 level WITHIN 4 YEARS.
2. Take graduate courses for advanced degree with Navy help.
3. Gain diversified RDT & E experience with the best equipment and facilities of their kind.
4. Work on research projects of recognized national importance.
5. Attend recognized professional gatherings, at which point a number of futures are available.

Watch for the David Taylor Model Basin interviewers when he visits your campus, or contact Mr. S. Di Maria directly for information.
