Tom Thomsen wanted challenging work

He found it at Western Electric

I. R. Thomsen, B.S.M.E., University of Nebraska, 58, came to Western Electric for several reasons. Important to him was the fact that our young engineers play vital roles right from the start, working in exciting engineering projects in communications, including electronic switching, thin film circuits, microwave systems and optical masers. Western Electric's wide variety of challenging assignments appealed to Tom, as did the idea of advanced study through full-time graduate engineering training, numerous management courses and a company-paid Tuition Refund Plan.

Tom knows, too, that we'll need thousands of experienced engineers for supervisory positions within the next few years. And he's getting the old experience necessary to qualify. Right now, Tom is developing new and improved inspection and process control techniques to reduce manufacturing costs of telephone switching equipment.

Tom is sure that Western Electric is the right place for him. What about you?

If you set the highest standards for yourself, enjoy a challenge, and want a career where you can make a difference, come to Western Electric. Our engineers are the key to our success. Join our team today. For more information, write: Western Electric Company, Room 6405, 222 Broadway, New York, New York 10273, N. Y. And be sure to arrange for a personal interview when the Bell System recruiting team visits your campus.

Key club satire and spies to enliven Tech Show

Tech Show will present How to Succeed in Espionage Without Really Spying. February 27 through March 9 through 7:30 in Kresge Auditorium.

A Boston key club is the cover for a Russian-Chinese spy ring which has been established to obtain scientific secrets from the MIT professors across the Charles. Chow-in Five, a Chinese secret agent from the People's Science Study Committee, is played by David Fox. His technical advice is a female spy, Chris Callaway from Boston University.

Intriguing complications arise around the disapproved "two-cultures" match of a scientist's daughter and a humanities major.

Tickets are available in the lobby of Building 31 or at Kresge Box Office for $1.00, $1.25, $2.50.

A Western Electric Manufacturing and Supply Unit of The Bell System

The northern half of the country. Thus the stability and heterogeneously populated north suffers from food shortages and fear of famine without the northern base of rice. Recent conflict between the Soviet Union and Communist China, culminating in the confrontation over the bone issue, has forced North Vietnam to abandon the carefully tended rice fields. A bad rice harvest in 1963 leaves the northern government in a desperate position.

A power struggle lies ahead for Vietnam when the aging autocrat, Ho Chi Minh, finally steps down.

Center for International Studies publishes report on 'Communism in North Vietnam'

The MIT Center for International Studies has published a new report, "Communism in North Vietnam." The author, F. J. Hen supply, an authority on Vietnamese history, gives the first full account of Ho Chi Minh's political maneuvering to maintain both the country's autonomy and its desperately needed aid from the two increasingly hostile major Communist powers.

Honey describes how Communism is threat upon the country. Ho Chi Minh, exploited the nationalist yearnings of his people by forcing the national resistance movement to rely on China and other Communist powers for military aid, a tiny minority of Communists in Indochina were the unchallenged leaders of North Vietnam. The Geneva agreement of 1954 gave the Communist control of the north and the national government. Thus the stability and heterogeneously populated north suffers from food shortages and fear of famine without the northern base of rice. Recent conflict between the Soviet Union and Communist China, culminating in the confrontation over the bone issue, has forced North Vietnam to abandon the carefully tended rice fields. A bad rice harvest in 1963 leaves the northern government in a desperate position.
