THE BELL TELEPHONE COMPANIES

SALUTE: STANTON PEEL

With Southern New England Telephone in New Haven, Stanton Peel (B.S., 1962) handles important engineering assignments for the current Plans Office. His projects have been as short as a matter of minutes, as long as several weeks. They have ranged from studies such as he made on the telephone facilities layout around Saybrook and Middlesex Junction, Connecticut, to the very comprehensive package he put together on Weather Announcement Service. Even though he's been with Southern New England Telephone less than a year, Stanton Peel has already established an enviable reputation for his thoroughness and keen analytical ability.

Stanton Peel, like many young engineers, is impatient to make things happen for his company and himself. There are few places where such restlessness is more welcomed than in the fast-growing telephone business.
